

Using the NCII Lesson Plans at Home: Tips for Parents

What are NCII lesson plans?

The National Center on Intensive Intervention provides free lesson plans that can be used at home to provide your child with extra practice in reading and math skills. They are easy to use and can be delivered in about 5-10 minutes. Want to see an example? Check out [these video demonstrations](#).

How do I use them?

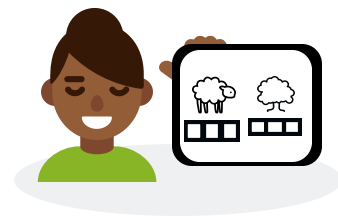

- 1 Talk to your child's teacher about which lesson plan to use.
- 2 Review the lesson plan to become familiar with the instructions, materials, and scripts.
- 3 Prepare the materials needed to deliver the lesson.
 - Print out the included resources, find items around your home, or use your hands for demonstrations.
- 4 Deliver the instruction as outlined in the lesson plan. [Follow the script!]

Tips for success!

- Don't expect perfection at first. Delivery gets easier over time.
- Keep sessions short and distribute practice throughout the day. Set aside 5-10 minutes at a time.
- Focus on repetition! Your child will need multiple opportunities to respond and receive feedback.
- Share challenges and progress with your child's teacher.
