INTRODUCTION

The Common Core Essential Elements (EEs) are linked to the Common Core State Standards (CCSS) for English Language Arts. A group of general educators, special educators, and content specialists from member states in the Dynamic Learning Maps (DLM) Consortium gathered to determine the essence of the CCSS.

This document provides a high-level view of the relationship between the CCSS and the links to performance for students with significant cognitive disabilities. It is intended to provide a beginning structure for the design of a summative alternate assessment. The document is not intended as a stand-alone guide to instruction, nor is it intended to contain all the steps in a complete learning progression or detailed curriculum. The DLM and associated professional development will provide greater detail than described in this document.

Beginning with the English Language Arts CCSS, stakeholders defined links to illuminate the precursors for the essential content and skills contained in the grade level CCSS standards and indicators. These EEs are not intended as a redefinition of the standards. Rather, they are intended to describe challenging expectations for students with significant cognitive disabilities in relation to the CCSS. The EEs clarify the bridge between grade-level achievement expectations for students with significant cognitive disabilities who participate in alternate assessments and the CCSS.

Neither are the EEs intended to prescribe the beginning or end of instruction on the content and skills they represent; rather, they indicate the grade level at which initial mastery would be the target to be assessed. Students should begin instruction in content and skills at the earliest point possible and continue instruction until mastery is attained.

The stakeholder group, consisting of state education agency (SEA) representatives and SEA-selected content teachers of students with significant cognitive disabilities, developed instructional achievement level descriptors (IALDs) for each of the EEs. IALDs were defined for four performance levels: I, II, III, and IV. Level III IALDs are aligned with the EEs. The target content and skills for each level of achievement, from Level I to Level IV, were then defined. For each target skill, the stakeholder group developed examples to illustrate how students might demonstrate achievement of the performance level. The IALDs are intended to provide an achievement ladder for students working toward achievement (Level III) of the EEs and onward (Level IV) and toward greater participation in the grade level CCSS to which the EEs are linked. The provided examples are intended to assist teachers to envision how the broad range of students with significant cognitive disabilities might perform the same content, despite the different challenges their disabilities might present. The examples are not exhaustive and do not represent the full range of possibilities in which the highly diverse population of students with significant cognitive disabilities might access the EEs or demonstrate the achievement of those elements. However, the examples do provide some of the ways that performance might be elicited and demonstrated across the spectrum of students with significant cognitive disabilities.

Finally, the stakeholder group developed alternate assessment achievement descriptors for each grade level -- from third grade through high school -- where summative assessments might be required. The alternate assessment achievement descriptors will provide a bridge between the EEs and a summative alternate assessment aligned to them. The descriptors are intended to provide one element to guide development of the test blueprint, development of items and

tasks that measure the full range of achievement, and the setting of cut scores during standard setting for the assessment. The focus of an alternate assessment in a standards-based system is based on the achievement that aligns with EEs linked to grade level content.

Together, the system of standards and descriptors is designed to allow students with significant cognitive disabilities to progress toward the achievement of state standards linked to grade level expectations. The relationship of standards and assessment to teaching and learning are depicted for use by teachers, assessment designers, and users of alternate assessment results.

NCLB GUIDANCE

The stakeholder group's work was guided by the U. S. Department of Education's *Standards and Assessments Peer Review Guidance: Information and Examples for Meeting Requirements of the No Child Left Behind Act of 2001 [NCLB]*, which requires that alternate academic achievement standards align with the alternate assessment. They must

- include knowledge and skills that link to grade level expectations,
- promote access to the general curriculum, and
- reflect professional judgment of the highest learning standards possible for the group of students with the most significant cognitive disabilities.

Although the grade-level content may be reduced in complexity or modified to reflect prerequisite skills, the link to grade-level standards must be clear. The Peer Review Guidance notes that the concept of alternate achievement standards related to grade level may be ambiguous. According to the Guidance, the descriptors

- should be defined in a way that supports individual growth because of their linkage to different content across grades;
- are not likely to show the same clearly defined advances in cognitive complexity as the general education standards when examined across grade levels;
- should rely on the judgment of experienced special educators and administrators, higher education representatives, and parents of students with disabilities as they define alternate achievement standards; and
- should provide an appropriate challenge for students with the most significant cognitive disabilities as they move through their schooling.

The Guidance requires links to grade-level standards. The EEs were developed by DLM consortium states to differentiate knowledge and skills by grade level. This differentiation is intended to clarify the link between the grade-level EEs and the grade-level CCSS and to show a forward progression across grades. The progression of content and skills across years of instruction reflect the changing priorities for instruction and learning as students move from grade to grade. The differences from grade level to grade level are often subtle and progression is sometimes more horizontal than vertical. For example, the grade-to-grade level differences may consist of added skills that are not of obvious increasing rigor compared to the differences found in the CCSS across grade levels. To the degree possible, skills escalate in complexity or rigor at Levels III and IV across the grades, with clear links to the shifting emphasis at each grade level in the CCSS.

ACCESS TO INSTRUCTION AND ASSESSMENT

The EEs and Achievement Descriptors developed by the DLM consortium states are intended to create the maximum possible access to the CCSS for students with significant cognitive disabilities. The way in which information is presented for instruction and assessment and the manner in which students demonstrate achievement is in no way intended to be limited by statements of EEs or Achievement Descriptors. To that end, modes of communication, both for presentation or response, are not stated in either the EEs or Achievement Descriptors unless a specific mode is an expectation. Where no limitation has been stated, no limitation should be inferred. Students' opportunities to learn and to demonstrate learning should be maximized by providing whatever communication, assistive technologies, augmentative and alternative communication (AAC) devices, or other access tools that are necessary and routinely used by the student during instruction.

Students with significant cognitive disabilities include a broad range of students with diverse disabilities and communication needs. For some students with significant cognitive disabilities, graphic organizers similar to those used by students without disabilities provide useful access to content and are adequate to maximize opportunities to learn and demonstrate achievement. Other students require a range of assistive technologies to access content and demonstrate achievement. For some students, AAC devices and accommodations for hearing and visual impairments will be needed. As with other physical disabilities, students with visual impairments may perform some expectations using modified items, presentations, or response formats. A few items may not lend themselves to such modifications. Decisions about the appropriate modifications for visual impairments are accounted for in the design of the assessments.

The access challenge for some is compounded by the presence of multiple disabilities. All of these needs, as well as the impact of levels of alertness due to medication and other physical disabilities which may affect opportunities to respond appropriately, need to be considered.

Most presentation and response access conditions do not constitute accommodations as they are understood for students who take the general assessment. Methods of presentation that do not violate the intended construct by aiding or directing the students' response allow the student to perceive what knowledge or skill is expected. Aids to responding that do not constitute a violation of the intended construct allow the student to demonstrate the expected knowledge and skills. Examples of acceptable access technologies include the following:

- communication devices that compensate for a students' physical inability to produce independent speech.
- devices that compensate for a students' physical inability to manipulate objects or materials, point to responses, turn pages in a book, or use a pencil or keyboard to answer questions or produce writing.
- tools that maximize a students' ability to acquire knowledge and skills and to demonstrate the products of their learning.

ACCESSING THE GENERAL CURRICULUM

Technology is also of particular importance to students with significant cognitive disabilities to access the general curriculum and achieve the EEs. Although educators have traditionally viewed technology as hardware and software, assistive technology tenets provide a broader view of the applications of low, medium, and high levels of technology use. Assistive technology tools can be vital to a student in acquiring and demonstrating learning unimpeded by the barriers that the disability presents.

Model Symbol Use Throughout Instruction

Many students with significant cognitive disabilities have difficulty with or cannot use speech to communicate and/or are supported by the use of communication symbols (e.g., communication boards, speech generating devices, voice output communication devices) and supports to augment their speech and other means of communication. Students who require symbols and other AAC supports require frequent modeling in the use of those symbols to interact and respond during instruction. Students who use symbols and other communication supports need as much modeling as children who use speech to communicate. Modeling in this way is not viewed as a means of prompting, guidance, or support, just as having a teacher talk serves those purposes for a student who communicates using speech.

When modeling the use of symbols and other communication supports, teachers use the symbols and supports themselves, hand them to students without communication impairments to use, and involve the students who need to use them every day. Each of these steps can play an important role in validating the use of symbols and communication supports and demonstrating multiple levels of expertise in their use.

Use Partner-Assisted Scanning Across the Day

Making a choice from the items on a list, symbols, tactuals, or a communication board can be difficult for some students because they lack the ability to point, cannot see or read the choices, or are positioned too far away (as in group activities). Partner-assisted scanning addresses these issues by asking the communication partner (a teacher, paraprofessional, or peer) to point to each of the options pausing long enough at each for the students with physical and communication impairments to respond “yes” if the item is their desired choice. Depending on the needs of an individual child, the partner can name each option when pointing or simply point.

Throughout the IALDS, examples are provided that require students to select, identify, recognize, and so forth from a number of options. It is suggested that teachers use partner-assisted scanning to support these modes of responding and communicating whenever it appears that the act of directly pointing to a response is too difficult for a particular student.

Use First-Letter Cueing as a Communication Strategy Whenever Possible

Students with communication impairments who are beginning to read, write, and communicate regularly face the challenge of not having access to the words or symbols they want or need to communicate effectively. When attempting to provide them with every possible word they might need, the result is an unmanageable communication system. When guessing what will be most important, it is inevitable that some guesses will be wrong. Until students can spell well enough to communicate their own thoughts, it is important to rely on cueing strategies.

First-letter cueing is one such strategy. Students can use an alphabet display to point to the first letter (or try to spell more) of the word they are trying to communicate. Teachers can use this strategy to help students respond efficiently to questions that involve known choices. Teachers can also model the use of first-letter cueing in their day-to-day interactions with the class. Natural opportunities to incorporate this strategy occur when the teacher is prompting students to recall a specific word (e.g., “I am thinking of a new word we learned yesterday that started with the letter *t*.”) or concept (e.g., “Who remembers the big word we learned to describe when we put things together to find out how many we have in all? It begins with the letter *a*.”). There are times every school day when the adults in the class can model the use of first-letter cueing.

Reading and Writing

Evidence is mounting (Institute for Community Inclusion, 2010; TASH, 2011; & University of Washington, 2010) to support the belief that students with significant cognitive disabilities can learn to read more than sight words, as once thought. It is important that these students are taught to use all the tools for decoding words. However, their journey requires more time to achieve basic reading goals. For that reason, *shared reading* is referenced for students in kindergarten through grade five while foundational skills are being taught and beyond that grade for students achieving below the EE targets. The materials students learn to read at these levels are also at a significantly reduced level of complexity and depth in recognition of the challenges they face in acquiring reading skills. Their need to acquire reading skills remains a goal throughout their school careers.

Writing for these students is also a challenge, but an important goal to attain. The examples provided in this document are intended to communicate that spelling words or writing complete sentences precisely is less important than developing basic writing skills. Many of these students face challenges in developing the required motor skills. While adaptive and alternate writing tools and other technologies are helpful, challenges remain. The technologies may help students overcome challenges in developing the required motor skills, but writing remains a cognitive challenge for these students. Composing sentences will require many years for students with significant cognitive disabilities to achieve. Still, early and continuing efforts are needed to maximize the achievement of these students in this important skill.

GUIDANCE AND SUPPORT

The authors of the CCSS use the words, “prompting and support” at the earliest grade levels to indicate when students were not expected to achieve standards completely independently. Generally, “prompting” refers to “the action of saying something to persuade, encourage, or remind someone to do or say something” (McKean, 2005). However, in special education, prompting is often used to mean a system of structured cues to elicit desired behaviors that otherwise would not occur. In order to communicate clearly that teacher assistance is permitted during instruction of the EEs, and is not limited to structured prompting procedures, the decision was made by the stakeholder group to use the more general term *guidance* throughout the EEs and alternate achievement descriptors.

Guidance and support during instruction should be interpreted as teacher encouragement, general assistance, and informative feedback to support the student in learning. Some examples of the kinds of teacher behaviors that would be considered guidance and support include

- getting the student started (e.g., “Tell me what to do first.”),
- providing a hint in the right direction without revealing the answer (e.g., Student wants to write dog but is unsure how, the teacher might say, “See if you can write the first letter in the word, /d/og.”),
- narrowing the field of choices as a student provides an inaccurate response,
- using structured technologies such as task specific word banks, or
- providing the structured cues such as those found in prompting procedures (e.g., least-to-most prompts, simultaneous prompting, and graduated guidance).

Guidance and support as described above apply to instruction per the examples provided in the IALDS. The IALDs are intended to provide an idea of how students might perform the EEs at the threshold to various achievement levels as they work toward independent mastery.

Alternate assessments measure the degree to which students with significant cognitive disabilities have mastered the EEs. During any assessment, accommodation(s) allowed on the assessment must have been used and practiced during instruction; however, some accommodations that are permissible during instruction would compromise the integrity of the assessments, thereby yielding invalid and unreliable results and cannot be used for assessment purposes. Some guidance and support strategies may not be allowed for assessment purposes when variance in teacher assistance, cues, and prompts could compromise judgments about mastery of the EEs and comparability of administration.

RELATIONSHIP TO THE DYNAMIC LEARNING MAPS ASSESSMENT

The EEs and Achievement Descriptors developed by the DLM consortium states and their stakeholder representatives serve two functions. Instructionally, they provide teachers with information about the level of knowledge and skills expected of their students. Second, they provide elaboration that teachers can use to help guide instruction toward achievement expectations. IALDs were developed for each of the EEs. Each IALD is further clarified by a range of examples. Teachers may find these examples useful for envisioning how their students might perform as they progress toward the expected achievement, as long as they keep in mind that they are examples only and cannot represent the full range of ways in which students might demonstrate their achievement.

Assessment Achievement Level Descriptors (AALDs) will emerge as drafts from the IALDS. The AALDs are content and grade specific, but summarize across the EEs the key performance differences across levels of achievement and across grade levels. While draft AALDs will be used in the initial stages of standard setting to help guide that process, final AALDs will emerge from the standard setting process. Standard setting will take into account the overall degree of accuracy with which a student would need to perform in order to achieve at a particular level. Just as on a general education assessment, no individual student will be expected to perform proficiently on every EE in order to be considered Level III.

For purposes of the DLM assessments under development, the achievement descriptors provide a useful link between the EEs and the DLM assessments. The descriptors, along with DLM developed from the CCSS, provide guidance to the development of the alternate assessment so that a full range of performance is measured and the setting of score ranges within each level rests on a defined frame of reference. The grade level EEs and alternate achievement standards

- standardize meaning for the content and skill expectations,
- create consistency in expected performance,
- emphasize skill similarities for all students participating in the alternate assessments,
- accommodate diverse disabilities, and
- ground alternate assessments in a consistent set of expectations.

Achievement descriptors are used to categorize and explain student performance both in the course of instruction and on the alternate assessment.

SYSTEM ALIGNMENT

The EEs and alternate achievement descriptors are intended to contribute to a fully aligned system of standards, curriculum, teaching, learning, technology, and assessment that optimize equity of opportunity for all students in each classroom, school, and local education agency to access and learn the standards. To the degree possible, the grade level EEs are vertically aligned and linked to the grade level CCSS.

The linkages provided by the EEs to the CCSS are intended to increase access to the general curriculum for all students with disabilities. Examples provided for IALDs at each level of achievement are designed for special education and general education classroom teachers to use in working with special education students who have significant cognitive disabilities. The examples are designed to help teachers evaluate students' progress toward achievement of the EEs as well as illuminate the kinds of performances that indicate various levels of achievement.

Just as the EEs and IALDS are designed to guide teaching practices toward achievement in academic content areas, the standards reframe the expectations for foundational skills in pre-academic and academic areas. Precursor/prerequisite and the unique enabling skills related to English language arts content is specified in the context of their roles as a foundation for students with significant cognitive disabilities to achieve skills related to academic content.

Levels of Performance

Within this document, each grade level EE is cross-referenced to one or several CCSS.

Four performance levels have been proposed for the DLM's alternate academic achievement standards: I, II, III, and IV. Mastery is considered to be demonstrated at Level III and Level IV and is identified as meeting the Level III level on an alternate assessment as specified in the NCLB. A general description of each of these levels is included below:

Level I - A student at this level attempts to perform tasks with support.

Level II - A student at this level demonstrates some content knowledge and skills from the extended grade level standards.

Level III - A student at this level demonstrates content knowledge and skills at a level aligned with the complexity of the EEs.

Level IV - A student at this level demonstrates content knowledge and skills at a higher level of complexity than those described for Level III. Typically, this complexity includes the routine use of symbol systems as applied to English Language Arts.

For each performance level, specific descriptions of content and skills are bulleted and examples of each level of performance are provided. The EEs, IALDs, and examples are intended as a resource for developing individualized education plan (IEP) goals, benchmarks, and curricular materials in reading, language arts, and mathematics. Students may need goals and benchmarks in areas other than academic content domains (e.g., self-care/living skills, mobility). As always, IEPs address the individual needs of each student to make progress toward the standards.

DOCUMENT ORGANIZATION

Common Core Grade-Level Standards are the Standard titles and Grade-Level Indicators as they appear in the CCSS for English Language Arts (Common Core State Standards Initiative, 2010).

Common Core Essential Elements (EEs) describe links to the CCSS for access by students with significant cognitive disabilities.

Instructional Achievement Level Descriptors (IALDs) describe performance at four achievement levels based on the EEs and are accompanied by examples at each achievement level.

Directions for Interpreting Essential Elements

Essential Elements (EEs). The EEs are statements that provide links for students with significant cognitive disabilities to the essential content and skills defined in the grade-level clusters of the CCSS. The EEs provide a bridge for students with significant cognitive disabilities to the CCSS. The EEs are not intended as a reinterpretation of the CCSS; rather, they were developed to create a bridge between the CCSS and challenging achievement expectations for students with significant cognitive disabilities. The order in which the EEs are listed is a direct reflection of the order in which the CCSS are listed. The order is not intended to convey a sequence for instruction; rather, it illustrates progress across years. In the tables, the left column contains the CCSS grade-level standards and indicators, the middle column contains the EE linked to them, and the right column contains the IALDs for each EE and examples for each IALD (as demonstrated by the example provided on the previous page). Each EE and IALD completes the phrase “Students will”

In keeping with the language of the English Language Arts CCSS document, the left hand column in this document will be titled CCSS Grade-Level Standards. This is worded differently in the Math CCSS and that is why the math document reads CCSS Grade-Level Clusters in the left-hand column.

NOTES: N/A is used instead of a descriptor under Level IV, if it was determined by the stakeholder group that the content of the CCSS could not be addressed. In other instances, an N/A at a particular grade level or within a CCSS does not imply that students should not be taught content, skills, or precursors related to the CCSS that are appropriate for instruction.

“Begins in grade ___” is utilized when the expectations for students to begin to demonstrate mastery is found at a higher grade level. Planning for instruction should incorporate instruction related to the higher grade level EE and begin at the earliest possible point for each student. Students with significant cognitive disabilities may require several years of instruction prior to the point at which they may be expected to begin to demonstrate mastery of a concept.

Bullets under instructional achievement levels denote descriptions of achievement at that level for the content related to the essential element.

Examples clarify certain components of EEs. The provided examples are illustrative, not exhaustive. They are intended to provide a range of ways in which a student may demonstrate progress toward the EE and communicate that spelling words and writing complete sentences precisely is less important than developing basic writing skills.

Verbally list major events from a familiar story. Ex. Use a voice output communication device to say, "That sounds important." when major events are read aloud during shared reading.</p> <p>Level III AA Students will: EERL.K.2. With guidance and support, identify major events in familiar stories. Ex. With guidance and support (e.g., remind the student to remember the terrible thing that happened in the story), identify a major event from a familiar story given an array of choices. Ex. With guidance and support (e.g., dramatic pause or rise in intonation by teacher), signal to indicate when a major event is read during a book sharing experience (e.g., the teacher is reading a book with the student and the student vocalizes, hits a switch, or otherwise signals the teacher to indicate that an event was just shared). Ex. With guidance and support (e.g., tells the student to find the part of the book where a major event is shown), turn to the part of a book where a major event is written about or depicted in the illustrations.</p> <p>Level II AA Students will: EERL.K.2. With guidance and support, identify a personally relevant event in familiar story. Ex. With guidance and support, identify an event from a familiar story that is related to own experience (e.g., a character in the story eats ice cream, which happens to be a favorite food for the student). Ex. With guidance and support, select from a field of choices using objects or pictures to indicate a favorite event in text. Ex. With guidance and support, stop or otherwise signal the reader when a preferred event occurs in a familiar story (e.g., In a teacher-made text, stop the teacher when he or she reaches the part of the book that shows a picture or tells about a favored person coming to visit). Ex. Given a picture card of a detail from a storybook, find the matching picture on a particular page from the book (e.g., In the story Are You My Mother?, the student is given a picture card of a dog because he has a dog. The student then finds the matching picture in the story book.)</p> <p>Level I AA Students will: EERL.K.2. With guidance and support, act out or complete personally relevant events in familiar stories. Ex. With guidance and support, complete the steps in a daily routine as they are read about in a book. Ex. With guidance and support, use gestures to indicate "all gone" while acting out eating a whole piece of cake at a class party as an adult reads about it in a book made by the class.</p>

Ex. With guidance and support during shared reading of a text about the weather (<i>What's the Weather Today?</i>), identify points the author makes about weather from an array of choices.</p> <p>Level II AA Students will: EERI.K.8. With guidance and support, recognize when a point the author makes in an informational text is read. Ex. With guidance and support during shared reading of a text about pumpkins (e.g., <i>From Pumpkin to Seed</i>) and the direction to listen to find out what the author says about the color of pumpkins, signal to indicate when the point is read aloud. Ex. With guidance and support during shared reading of a teacher-made text about a classroom routine and the direction to listen to figure out what the author says to do first, stop the reader when the appropriate part is read.</p> <p>Level I AA Students will: EERI.K.8. With guidance and support during shared reading, interact with or explore illustrations, objects, or other tactual representations of an informational text. Ex. With guidance and support during shared reading of an informational text, interact with objects that represent the information in the text. Ex. With guidance and support during shared reading, explore the tactual information on the page of an adapted book. Ex. With guidance and support during shared reading, visually explore the illustrations in a text.</p>

Name a topic and use drawing, dictating, or writing to share information about it. Ex. Use a multiple message voice output device to communicate a topic of choice of writing (e.g., friends) and then uses the device to select words that provide information about friends. Ex. Tell the teacher a topic for writing and then dictate information about it.</p> <p>Level III AA Students will: EEW.1.2. Select a topic and use drawing, dictating, or writing to share information about it. Ex. Select a topic from an array of choices and uses drawing, dictating, writing, assistive technology, or other means of expression to convey a feeling, thought, idea, or need relative to the topic. Ex. Select “my birthday” as a topic and draws a picture of something he or she wants. Ex. After choosing to write about him/herself, use drawing, dictating, writing, assistive technology, or other means of expression to state a fact about themselves.</p> <p>Level II AA Students will: EEW.1.2. With guidance and support, use drawing, dictating, or writing to share information about a topic. Ex. After discussing favorite things with a small group, use drawing and writing to communicate about own favorite things. Ex. In structured shared writing entitled “Animals,” during which the teacher uses a repeated sentence frame to guide students in creating a predictable chart with the repeated line, <i>The <animal> is <color></i>, select an appropriate animal which the teacher will write on the chart (e.g., The panther is black. The dog is brown.). Ex. Given a structured sentence, choose a classmate, and select from a couple of descriptor symbols to complete the statement: <Name> is <descriptor> (e.g., Dallas is short. Erin is happy.), which are added to a class chart text.</p> <p>Level I AA Students will: EEW.1.2. With guidance and support, select a topic. Ex. After the teacher presents two of the student’s favorite toys, select one when asked, “What should we write about today?” Ex. Work with a group of peers on a writing topic (e.g., The peers narrow down the choices and then presents two to the student who says, “What should we write about today?”). Ex. Given a selection of topics and with partner-assisted scanning, choose a topic of interest.</p>

Select an event and use drawing, dictating, or writing to share information about it.</p>	<p>Level IV AA Students will: EEW.1.3. Introduce or name events and use drawing, dictating, or writing to share information about them. Ex. During a field trip, tell the teacher three things that happened, and upon returning to the classroom, draw and/or write about those things in a three-panel frame in the order they occurred. Ex. Following an historical text teacher read-aloud, recount events remembered in a small group, individually choose two events from those recalled, and draw/write about them beginning each recount with “first,” and then “second.”</p> <p>Level III AA Students will: EEW.1.3. Select an event and use drawing, dictating, or writing to share information about it. Ex. During a shared writing activity, draw a picture of a class field trip to a zoo that describes an event (a bus ride) from the trip. Ex. Use a multiple message voice output device to dictate information about an experience during a learning center (e.g., big, bubble, pop, blow, more).</p> <p>Level II AA Students will: EEW.1.3. With guidance and support, select an event and use drawing, dictating, or writing to share information about it. Ex. Given an array of photos from a class activity, select one of the pictures, spend time talking about the event depicted in the picture with an adult or peer, and then label it verbally while the teacher writes the labels. Ex. Working with a teacher who is modeling how to select messages on a multiple message voice output device, select messages to dictate information about an experience during a learning center (e.g., read, funny, book, friends, fun). Ex. Working with the teacher before snack (or other daily activities), brainstorm the actions of familiar routines, then select one for the teacher to write on a chart (e.g., wash hands, eat snack, eat lunch).</p> <p>Level I AA Students will: EEW.1.3. With guidance and support, select a preferred event or activity. Ex. From a picture menu of items, point to or use partner-assisted scanning to choose a preferred event or activity. Ex. After dictating a story about a self-selected topic to a teacher, say more when the teacher asks, “What else can you tell me about that?” Ex. After sharing a drawn, dictated, or written text, add more when the teacher asks, “What else can you add?”</p> <p>Level II AA Students will: EEW.1.5. With guidance and support, draw, dictate, or write more when asked. Ex. During writing time, keep drawing when the teacher says, “Keep going. What else can you tell us?” Ex. While writing on a computer listening to the speech feedback from a talking word processor, continue to add more letters when the teacher says, “Tell us more. You know so much about <whatever initiated the writing>.” Ex. Take turns typing letters or words about a picture or shared experience with a proficient or advanced peer using an adapted keyboard with only letters and a spacebar available.</p> <p>Level I AA Students will: EEW.1.5. With guidance and support, explore tools for drawing, writing, and self-expression. Ex. Touch, bang on, or otherwise interact with a computer keyboard when presented with a photo of a favorite activity, person, or place, and when directed by the teacher to “Tell me more,” touch, bang on, or otherwise interact with the keyboard some more. Ex. Make marks on a paper with a crayon when it is presented. Ex. After a teacher models a simple message on student’s first draft and provides invitation, student explores writing further (e.g., “Run. I see that dog in the picture run.”).</p>

Participate in conversations with peers and adults.</p> <p>a. Engage in multiple-turn exchanges with peers.</p>	<p>Level IV AA Students will:</p> <p>EESL.1.1.a. Initiate multiple-turn exchanges with peers.</p> <p>Ex. During a literacy center activity, hold up own work to show peer and say, “look.”</p> <p>When peer responds, the student continues in the exchange for at least one more turn.</p> <p>Ex. When getting ready to read with a partner, initiate an interaction saying, “Read?” The peer responds “Sure, where should we go?” and the student says, “corner” while pointing to the reading corner. The interaction continues so that both students have at least two turns.</p> <p>Ex. During snack time, use a multiple message voice output device to say, “Scooby Doo!” and then looks directly at a peer. The peer responds, “Scooby Doo!” The student uses the device to link together, “You - Scooby Doo!” and the peer responds, “No, you - Scooby Doo.” The interaction continues with the two playfully teasing one another.</p> <p>Level III AA Students will:</p> <p>EESL.1.1.a. Engage in multiple-turn exchanges with peers.</p> <p>Ex. While at a literacy center working with letters and words, participate in multiple-turn exchanges (e.g., one of the peers hands the student a letter and says, “You need this one?” The student replies, “No, b!” The peer finds a b and says, “This one?” The student replies, “Yeah, b.”).</p> <p>Ex. When the snack helper asks, “What do you want?” and holds up the white milk and chocolate milk, look directly at the chocolate milk. When the peer acknowledges, “Okay, chocolate,” use sign language to say, “Thank you.” The peer replies, “You’re welcome.”</p> <p>Ex. Use a sequenced message device to communicate a social script with a peer such as: Student activates switch to say, “Wanna hear a joke?” Peer says “Okay.” Student activates switch to say, “What number does a pig call when he’s in trouble?” Peer says, “I don’t know” and student activates switch to say “Swine 1-1.”</p> <p>Level II AA Students will:</p> <p>EESL.1.1.a. COMMON CORE ESSENTIAL ELEMENTS AND ACHIEVEMENT DESCRIPTORS FOR FOURTH GRADE

Fourth Grade English Language Arts Standards: Reading (Literature)

CCSS Grade-Level Standards	Common Core Essential Elements	Instructional Achievement Level Descriptors
<p>Key Ideas and Details.</p> <p>RL.4.1. Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.</p>	<p>EEERL.4.1. Use details from the text to recount what the text says.</p>	<p>Level IV AA Students will:</p> <p>EEERL.4.1. Refer to details in recounting what the text says. Ex. After reading or listening to a text, recount the story referring to details in the text without looking back at the text or other supports. Ex. Before the teacher begins a shared reading of a familiar text, she asks the students to tell her what they remember about the book, and the students recount the text including specific details. Ex. When reading aloud, match word cards to the words that they hear and see during the reading. (e.g., <i>The Cricket in Times Square</i> – match “Chester” or “New York”; <i>The Borrowers</i> – match words for “little people,” “Clock family,” or “borrowing”), then use them to recount the story.</p>
		<p>Level III AA Students will:</p> <p>EEERL.4.1. Use details from the text to recount what the text says. Ex. When given picture or verbal choices, select correct details from the story and then use those details in recounting the text. Ex. With the text projected on an interactive whiteboard, underline details, and then use those underlined details in recounting the text. Ex. Use sticky-note tags to identify details in text and use those tagged to recount the text.</p> <p>Level II AA Students will:</p> <p>EEERL.4.1. Recount a portion of the text. Ex. After repeated reading or listening to a text, recount the end of the text. Ex. Before the teacher begins a shared reading of a familiar text, when asked to tell what they remember about the book, recount one event from the story.</p> <p>Level I AA Students will:</p> <p>EEERL.4.1. Identify a detail from the text. Ex. Given an array of illustrations including some from the text and others that are not from the text, identify an illustration from the story. Ex. Given a list of details, identify a detail from the text using partner-assisted scanning (adult reads the list and student signals when a desired choice is read).</p>

CCSS Grade-Level Standards	Common Core Essential Elements	Instructional Achievement Level Descriptors
<p>RL.4.2. Determine a theme of a story, drama, or poem from details in the text; summarize the text.</p> <p>RL.4.3. Describe in depth a character, setting, or event in a story or drama, drawing on specific detail in the text (e.g., a character’s thoughts, words, or actions).</p>	<p>EERL.4.2. Determine the main idea of a text.</p> <p>EERL.4.3. Use details from text to describe a character in a story.</p>	<p>Level IV AA Students will:</p> <p>EERL.4.2. Identify the theme of a text. Ex. After determining the main idea, identify the theme from an array of choices. Ex. Given a story that teaches a lesson like “be kind,” identify <i>kind</i> as the theme of the story.</p> <p>Level III AA Students will:</p> <p>EERL.4.2. Determine the main idea of a text. Ex. When given a text and multiple choices, identify the main idea (e.g., Dogs are fun pets.). Ex. After reading or listening to a text, state the main idea.</p> <p>Level II AA Students will:</p> <p>EERL.4.2. When given a detail, identify the central idea of a text. Ex. After reading or hearing a text, select an object or picture from choices that goes with the central idea.</p> <p>Level I AA Students will:</p> <p>EERL.4.2. Identify a word from a familiar text. Ex. After reading or listening to a text, point to a word from the text (e.g., After reading a story about dogs, point to the word <i>dog</i> or representation of a dog.). Ex. After listening to a text, point to an object that was in the story.</p>
<p>RL.4.3. Describe in depth a character, setting, or event in a story or drama, drawing on specific detail in the text (e.g., a character’s thoughts, words, or actions).</p>	<p>EERL.4.3. Use details from text to describe a character in a story.</p>	<p>Level IV AA Students will:</p> <p>EERL.4.3. Use details from text to describe multiple attributes of a character in a story. Ex. Asked to describe a character, use words like <i>tall</i> and <i>fast</i> from the story to describe the character. Ex. Using details from a story, create a character “wanted” poster with descriptors like <i>tall</i>, <i>old</i>, <i>mean</i>, etc.</p> <p>Level III AA Students will:</p> <p>EERL.4.3. Use details from text to describe a character in a story. Ex. Given the text projected on an interactive whiteboard, underline details in the text that describe the specified character. Ex. Given a list of details from the story, select the details that describe a character.</p> <p>Level II AA Students will:</p> <p>EERL.4.3. Identify the name of a character in a story. Ex. Given a description of a character from a story, identify the name of the character. Ex. Asked who is a character in a story, identify the name of one of the characters in the story.</p> <p>Level I AA Students will:</p> <p>EERL.4.3. Identify details from a familiar story. Ex. Given two or more choices, identify the detail that is from the familiar story. Ex. Identify the name of a character from a familiar story.</p>

<p>CCSS Grade-Level Standards</p> <p>Craft and Structure.</p> <p>RL.4.4. Determine the meaning of words and phrases as they are used in a text, including those that allude to significant characters found in mythology (e.g., Hercules).</p>	<p>Common Core Essential Elements</p> <p>EERL.4.4. Determine meaning of words in context.</p>	<p>Instructional Achievement Level Descriptors</p> <p>Level IV AA Students will:</p> <p>EERL.4.4. Use context to determine a missing word from a sentence. Ex. Given two or more sentences with one word missing, student will use context to identify the missing word from an array of choices. Ex. Given a word in context, find a Google image or another search engine to search for an image appropriate to the meaning of the word.</p> <p>Level III AA Students will:</p> <p>EERL.4.4. Determine meaning of words in context. Ex. After reading a text, create a picture of the word or character based on descriptions in the text. Ex. Identify the words in a text that provide clues that help determine the meaning of an unknown word and use them to determine the meaning.</p> <p>Level II AA Students will:</p> <p>EERL.4.4. Identify two or more words that are related to one another. Ex. Given a word from the text, identify two or more related words from a list provided by the teacher. Ex. Create a graphic organizer showing connections between a new word found in text and other known words.</p> <p>Level I AA Students will:</p> <p>EERL.4.4. After listening to or reading a text, touch or look at a picture, object, or other symbolic representation of the word. Ex. After reading or listening to a book and an adult saying or signing a word from the text, find a picture or object that represents the word. Ex. After hearing a text about drums, touch a drum, drumstick, and other drum-related objects to demonstrate understanding of the drum-related words. Ex. Match a word from the text to a picture or object that represents the word.</p>

After working with the teacher to choose a topic and three objects and artifacts, select appropriate pictures (presented on index cards) that go with each of the objects and artifacts and then use assistive technology to write about the pictures).</p> <p>Level I AA Students will: EEW.4.2.b. With guidance and support, the student identifies symbols that relate to the topic. Ex. Working with the teacher who has gathered an assortment of picture communication symbols, identify symbols that relate to a stated topic (e.g., food), which the teacher then writes as words and reads aloud while pointing. Ex. Working with a speech-language pathologist, navigate through a dynamic display communication device to find the page of symbols that relates to a particular topic (e.g., emotions, food, people, places) which are used to type whole words in a word processor.</p>

<p>Text Types and Purposes.</p> <p>W.5.1. Write opinion pieces on topics or texts, supporting a point of view with reasons and information.</p> <p>a. Introduce a topic or text clearly, state an opinion, and create an organizational structure in which ideas are logically grouped to support the writer’s purpose.</p>	<p>EEW.5.1. Write an opinion about a topic or text and reasons to support the opinion.</p> <p>a. Introduce a topic or text and state an opinion about it.</p>	<p>Level IV AA Students will:</p> <p>EEW.5.1.a. Independently introduce a topic or text and state an opinion about it.</p> <p>Ex. During free writing time in class, write an opinion about a favorite local team in their journal.</p> <p>Ex. Given a double-entry journal, enter information and quote from text in the first column, and express opinions about that information in the second column.</p> <p>Level III AA Students will:</p> <p>EEW.5.1.a. Introduce a topic or text and state an opinion about it.</p> <p>Ex. For a book review assignment, write the name of a self-selected text, and then write an opinion about it.</p> <p>Ex. Given an opinion essay writing assignment, write a topic (e.g., <i>school corndogs</i>) and then state an opinion about it (e.g., <i>school corndogs bad</i>).</p> <p>Level II AA Students will:</p> <p>EEW.5.1.a. With guidance and support, introduce a topic or text and state an opinion about it.</p> <p>Ex. Use a ready-made set-up in multimedia software to select a book by clicking on a scanned picture of the cover and select an opinion from a bank of words and phrases which is entered in a word document.</p> <p>Ex. Working with a teacher who walks the student through each step, first select a book from a collection offered by the teacher. Next, the teacher asks, “Do you think it was a good book?” The student replies, “yes” and the teacher tells the student to write <i>It was good</i> providing spelling support as needed.</p> <p>Ex. Given a template (e.g., <Name of book> is <great, good, bad, awful>.), write the topic sentence for a book review.</p> <p>Level I AA Students will:</p> <p>EEW.5.1.a. With guidance and support, identify an opinion about a text or topic.</p> <p>Ex. After reading a book with the class, state an opinion about it when asked (e.g., The teacher asks the student, “Did you like it?” and the student responds, “no” by looking down, shaking his head, or engaging in whatever gesture means no.), and observe/listen as the teacher says and writes, “<Name of student> does not like <Title of book>.”</p> <p>Ex. While peers are writing, indicate an opinion about the topic (e.g., Peers are writing letters to the cafeteria about the corndogs they serve, the teacher asks the students, “Do you think the corndogs are good or bad?” and shows two picture communication symbols (<i>good, bad</i>). The student looks at, points to, or touches the picture symbol of <i>bad</i>.) Then, the student observes and listens as the teacher models by writing and speaking aloud, “Corndogs are bad.”</p>

After writing, <i>school corndogs are bad</i>, the student writes reasons <i>cold, no stik [stick], not krute [crunchy]</i>. Ex. After writing an opinion (e.g., <i>good to read</i>) of a text (<i>Operation Redwood</i>), write reasons (e.g., <i>like trees, boy good</i>). Level II AA Students will: EEW.5.1.b. With guidance and support, provide reasons to support the opinion. Ex. After writing an opinion of a book (<i>so-so</i>), select reasons from a bank of options and alphabet letters in talking word processing software (e.g., <i>characters, boring, too long</i>). Ex. After writing, <i>school corndogs are bad</i>, complete slot-filler sentences prepared by the teacher in talking word processing software: <i>Corndogs are bad because they cold. They need stick.</i> Level I AA Students will: EEW.5.1.b. With guidance and support, select from an array of reasons to support an opinion. Ex. Given an array of words that support the opinion that a book was <i>bad</i>, look at, point to, circle, or otherwise mark words to support the opinion which the teacher adds to the topic sentence and reads aloud as the student listens/observes (e.g., “<Name of student> does not like <Title of book> because it is <boring, scary, too long, not funny>”). Ex. Given a ready-made set-up in multimedia software, use scanning to select reasons that <i>corndogs are bad</i> from an array of logical reasons, which the teacher models by writing and speaking aloud in a repeated line structure (e.g., “Corndogs are bad. They are greasy. They are cold. They are stale.”).</p>

GLOSSARY OF ENGLISH LANGUAGE ARTS TERMS

Adapted text (simplified). Substitutes linguistically frequently occurring vocabulary for infrequently occurring nontechnical vocabulary, shortens sentence length, lowers reading level, and restructures sentences to reduce their complexity. See http://www.coursecrafters.com/ELL-Outlook/2006/mar_apr/ELLOutlookITIArticle1.htm

Adapted text (elaborated). Clarifies, elaborates, and explains implicit information and makes connections explicit with words sometimes added to increase comprehension. See http://www.coursecrafters.com/ELL-Outlook/2006/mar_apr/ELLOutlookITIArticle1.htm

Assistive technology. Any item, piece of equipment, or product system, whether acquired commercially, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of individuals with disabilities. See <http://standards.gov/assistivetechology.cfm>

Context clues. Bits of information from the text that, when combined with the reader's own knowledge, help the reader determine the meaning of the text, or unknown words in the text.

Decoding. Understanding that a printed word represents the spoken word, and that this printed word is made of a sequence of phonemes.

Digital literacy. Ability to use digital technology, communication tools, or networks to locate, evaluate, use and create information; ability to understand and use information in multiple formats from a wide range of sources when it is presented via computers; person's ability to perform tasks effectively in a digital environment. Literacy includes the ability to read and interpret media, to reproduce data and images through digital manipulation, and to evaluate and apply new knowledge gained from digital environments. See <http://www.library.illinois.edu/digit/definition.html>

Digital tools. Tools that involve or relate to the use of a computer/technology.

Distracters. An incorrect choice among multiple-choice answers on a question or test. See <http://dictionary.reference.com/browse/distractor>

Encode. To represent complicated information in a simple or short way.

Episode. A brief unit of action in a literary work; a situation that is part of a narrative.

Figurative language. Uses "figures of speech" as a way of saying something other than the literal meaning of the words (e.g., All the world's a stage.); hyperbole, metaphor, onomatopoeia.

Figurative meaning. Exaggerated or altered meaning of words used as a figure of speech (e.g., She swims like a dolphin (simile); figurative meaning is that she swims very well.).

Formal language. Adheres to stricter grammar rules, does not follow informal, spontaneous language (language between friends).

Graphic organizer. A diagram or pictorial device used to record and show relationships among ideas or information. An example could be a Venn diagram or a T-chart.

Guided writing activities/lessons. Temporary, small group lessons teaching strategies that students most need to practice with guidance from a teacher. See <http://www.readwritethink.org/professional-development/strategy-guides/guided-writing-30685.html>

High-frequency words. Words that appear frequently in writing, reading, and language.

Hyperbole. Way of speaking or writing (emphatic exaggeration) that makes someone or something sound bigger, better, more, etc. than they are (e.g., You’ve grown like a bean sprout!).

Idiom. Words in a fixed order that have a particular meaning that is different from the meaning of each word separately (e.g., “Bitten off more than you can chew.”; “It’s raining cats and dogs.”; and “A little under the weather.”)

Independent writing. Children write their own pieces, such as stories and informational narratives, retellings, labeling, speech balloons, lists, etc. See http://www.oe.k12.mi.us/balanced_literacy/independent_writing.htm

Inference. Assuming that something is true or forming an opinion based on information.

Informational (natural) language. Refers to spontaneous language (language between friends) that has less strict grammar rules and/or shorter sentences.

Informational text. Text that intends to provide information on a particular topic (e.g., an essay written about the Battle of Gettysburg).

Informational essay/text/writing. Writing that intends to provide information on a particular topic (e.g., Students write informational pieces about the effects of global warming, the impact of women in politics, and the salaries and endorsements in professional sports.).

Intonation. The sound changes produced by the rise and fall of the voice when speaking, especially when this has an effect on the meaning of what is said.

Literary elements. Characterizations, setting(s), plot(s) (including exposition, rising action, climax, and falling action), and theme(s) developed by an author over the course of a story.

Metaphor. An expression (figure of speech) which describes a person or object in a literary way by referring to something that is considered to have similar characteristics to the person or object being described, such as “The mind is an ocean,” and “The city is a jungle.”

Multimedia book. Combines media of communication (e.g., text, graphics, and sound).

Multimodal. Having or involving several or a combination of learning styles, modes, or modalities (e.g., auditory, kinesthetic, visual, or a combination).

Onomatopoeia. The creation and use of words which include sounds that are similar to the noises (imitates) that the words refer to (e.g., hiss, buzz, bang, or the word “zip” imitates the sound of zipping up one’s coat).

Open-ended questions. A question beginning with such words as *what, why, how, describe that* are designed to encourage a full, meaningful answer using the subject’s own knowledge and/or feelings. See <http://www.mediacollege.com/journalism/interviews/open-ended-questions.html> and http://changingminds.org/techniques/questioning/open_closed_questions.htm

Phonemes. Abstract units of the phonetic system of a language that corresponds to a set of similar speech sounds (as the velar \k\ of cool and the palatal \k\ of keel) which are perceived to be a single distinctive sound in the language. See <http://www.merriam-webster.com/dictionary/phoneme>

Phonetic spelling. The representation of vocal sounds which express pronunciations of words and a system of spelling in which each letter represents invariably the same spoken sound. See <http://dictionary.reference.com/help/faq/language/s08.html>

Picture exchange cards (PECS). Originally created by Pyramid Products as a tool for communicating with non-verbal people on the spectrum. Since its invention, though, “PECS” has become shorthand for any kind of image-based communication.

Prompt levels/prompt hierarchy. To make something happen.

- **Verbal prompts** - Statements that help learners acquire target skills (e.g., “You might need to try it a different way,” “Write your name.”).
- **Gestural prompts** - Movements that cue learners to use a particular behavior or skill (e.g., pointing to the top of the paper where the learner needs to write his name).
- **Model prompts** - Models the target skill or behavior. Full model prompts can be verbal if the skill being taught is verbal, or they can be motor responses if the skill being taught involves moving a body part.
- **Physical prompts** - Touches to help a student use the target behavior or skill (e.g., tapping a learner’s hand to cue writing, putting hand over learner’s to help writing).
- **Visual prompts** - Pictures of events that provide learners with information about how to use the target skill or behavior (e.g., task analysis checklist, transition picture card). See <http://autismpdc.fpg.unc.edu/content/prompting>

Roots (morphemes). The most basic form of a word that is still able to convey a particular thought or meaning.

Segmental phonemes. One of the phonemes (as \k, a, t\ in cat, tack, act) of a language that can be assigned to a relative sequential order of minimal segments. See <http://www.merriam-webster.com/dictionary/segmental%20phoneme>

Sensory language/sensory words. Words that refer to the senses of sight, touch, hearing, smell, and taste that can help add realism to writing.

Shared reading. An interactive reading experience where children interact with the reading of a big book or other enlarged text as guided by a teacher or other experienced reader, generally accomplished using an enlarged text that all children can see. See http://www.oe.k12.mi.us/balanced_literacy/shared_reading.htm

Shared writing activity/modeled writing. An approach to writing where the teacher and children work together to compose messages and stories where children provide the ideas and the teacher supports the process as a scribe. The message is usually related to some individual or group experience. The teacher provides full support, modeling and demonstrating the process of putting children’s ideas into written language. See http://www.oe.k12.mi.us/balanced_literacy/modeled_writing.htm

Short essay. Literary composition on a single subject, usually presenting the personal view of the author. See <http://www.thefreedictionary.com/essay>

Simile. The use of an expression (figure of speech) comparing one thing with another, always including the words “as” or “like” (e.g., She swims like a dolphin.).

Social story. Describes a situation, skill, or concept in terms of relevant social cues, perspectives, and common responses and shares accurate social information that is easily understood by its audience. See <http://www.thegraycenter.org/social-stories/what-are-social-stories>

Speech/voice-to-text technology. A type of speech recognition program that converts spoken to written language. See <http://searchunifiedcommunications.techtarget.com/definition/voice-to-text>

Spatial and temporal relationships/meaning words. Signal event order (e.g., *behind*, *under*, *after*, *soon*, *next*, and *later*).

Story elements. Plot, setting, genre, point of view, characters, and order of events.

Textual evidence. Evidence from one or more texts used to support an argument/position, and is derived from reading and drawing from other text(s). It is provided in the form of quotation, paraphrase, descriptions of theory, and also description. See http://wiki.answers.com/Q/What_is_a_textual_evidence

Theme or central idea. Main thought or topic in a work of literature

Vivid verbs. Words that express an action with an implied emphasis (e.g., “He sprinted down the street,” or “He dashed down the street,” rather than “He ran down the street.”).

Word family. Groups of words that have a common feature or pattern (also known as phonograms, rhymes, or chunks). *At*, *cat*, *hat*, and *fat* are a family of words with the “at” sound and letter combination in common. Common word families include: *ack*, *ain*, *ake*, *ale*, *all*, *ame*, *an*, *ank*, *ap*, *ash*, *at*, *ate*, *aw*, *ay*, *eat*, *ell*, *est*, *ice*, *ick*, *ide*, *ight*, *ill*, *in*, *ine*, *ing*, *ink*, *ip*, *it*, *ock*, *oke*, *op*, *ore*, *ot*, *uck*, *ug*, *ump*, *unk*. See <http://www.enchantedlearning.com/rhymes/wordfamilies/>

GLOSSARY OF SPECIAL EDUCATION TERMS

Accommodations. Changes in the administration of an assessment, such as setting, scheduling, timing, presentation format, response mode, or others, including any combination of these that does not change the construct intended to be measured by the assessment or the meaning of the resulting scores. Accommodations are used for equity, not advantage, and serve to level the playing field. To be appropriate, assessment accommodations must be identified in the student’s Individualized Education Plan (IEP) or Section 504 plan and used regularly during instruction and classroom assessment.

Achievement descriptors. Narrative descriptions of performance levels that convey student performance at each achievement level and further defines content standards by connecting them to information that describes how well students are doing in learning the knowledge and skills contained in the content standards. See also “performance descriptors.”

Achievement levels. A measurement that distinguishes an adequate performance from a novice or expert performance. Achievement levels provide a determination of the extent to which a student has met the content standards. See also “performance levels.”

Achievement standard. A system that includes performance levels (e.g., unsatisfactory, proficient, or advanced), descriptions of student performance for each level, examples of student work representing the entire range of performance for each level, and cut scores. A system of performance standards operationalizes and further defines content standards by connecting them to information that describes how well students are doing in learning the knowledge and skills contained in the content standards. See also “performance standards.”

Achievement test. An instrument designed to measure efficiently the amount of academic knowledge and/or skill a student has acquired from instruction. Such tests provide information that can be compared to either a norm group or a measure of performance, such as a standard.

Age appropriate. The characteristics of the skills taught, the activities and materials selected, and the language level employed that reflect the chronological age of the student.

Alignment. The similarity or match between or among content standards, achievement (performance) standards, curriculum, instruction, and assessments in terms of equal breadth, depth, and complexity of knowledge and skill expectations.

Alternate assessment. An instrument used in gathering information on the standards-based performance and progress of students whose disabilities preclude their valid and reliable participation in general assessments. Alternate assessments measure the performance of a relatively small population of students who are unable to participate in the general assessment system, even with accommodations, as determined by the IEP team.

Assessment. The process of collecting information about individuals, groups, or systems that relies upon a number of instruments, one of which may be a test, making assessment a more comprehensive term than *test*.

Assessment literacy. The knowledge of the basic principles of sound assessment practice including terminology, development, administration, analysis, and standards of quality.

Assistance. (versus support) The degree to which the teacher provides aid to the student’s performance that provides direct assistance in the content or skill being demonstrated by the student. That is, the assistance involves the teacher performing the cognitive work required. Assistance results in an invalidation of the item or score. See also “support.”

Assistive technology. A device, piece of equipment, product system or service that is used to increase, maintain, or improve the functional capabilities of a student with a disability. (See 34 CFR §300.5 and 300.6.)

Cues. Assistance, words, or actions provided to a student to increase the likelihood that the student will give the desired response.

Curriculum. A document that describes what teachers do in order to convey grade-level knowledge and skills to a student.

Depth. The level of cognitive processing (e.g., recognition, recall, problem solving, analysis, synthesis, and evaluation) required for success relative to the performance standards.

Disaggregation. The collection and reporting of student achievement results by particular subgroups (e.g., students with disabilities, limited English proficient students), to ascertain the subgroup’s academic progress. Disaggregation makes it possible to compare subgroups or cohorts.

Essence of the Standard. Is that which conveys the same ideas, skills, and content of the standard, expressed in simpler terms.

Essential Elements (EEs or CCEEs). The Common Core Essential Elements are specific statements of the content and skills that are linked to the Common Core State Standards (CCSS) grade level specific expectations for students with significant cognitive disabilities.

Grade Band Essential Element. A statement of essential precursor content and skills linked to the Common Core State Standards (CCSS) grade-level standards and indicators that maintain the essence of that standard, thereby identifying the grade-level expectations for students with significant cognitive disabilities to access and make progress in the general curriculum.

Grade level. The grade in which a student is enrolled.

Individualized Education Program (IEP). An IEP is a written plan, developed by a team of regular and special educators, parents, related service personnel and the student, as appropriate, describing the specially designed instruction needed for an eligible exceptional student to progress in the content standards and objectives and to meet other educational needs.

Linked. A relationship between a grade-level indicator for Common Core State Standards (CCSS) and Common Core Essential Elements (EEs or CCEEs) that reflects similar content and skills but does not match the breadth, depth, and complexity of the standards.

Multiple measures. Measurement of student or school performance through more than one form or test

- For students, these might include teacher observations, performance assessments, or portfolios.
- For schools, these might include dropout rates, absenteeism, college attendance, or documented behavior problems.

Natural cue. Assistance given to a student that provides a flow among the expectations presented by the educator, opportunities to learn, and the desired outcome exhibited by the student.

Opportunity to learn. The provision of learning conditions, including suitable adjustments, to maximize a student’s chances of attaining the desired learning outcomes, such as the mastery of content standards.

Readability. The formatting of presented material that considers the organization of text; syntactic complexity of sentences; use of abstractions; density of concepts; sequence and organization of ideas; page format; sentence length; paragraph length; variety of punctuation; student background knowledge or interest; and use of illustrations or graphics in determining the appropriate level of difficulty of instructional or assessment materials.

Real-world application. The opportunity for a student to exhibit a behavior or complete a task that he or she would normally be expected to perform outside of the school environment.

Response requirements. The type, kind, or method of action required of a student to answer a question or testing item. The response may include, but is not limited to, reading, writing, speaking, creating, and drawing.

Stakeholders. A group of individuals perceived to be vested in a particular decision (e.g., a policy decision).

Standardized. An established procedure that assures that a test is administered with the same directions, under the same conditions, and is scored in the same manner for all students to ensure the comparability of scores. Standardization allows reliable and valid comparison to be made among students taking the test. The two major types of standardized tests are norm-referenced and criterion-referenced.

Standards. There are two types of standards, content, and achievement (performance).

- **Content standards.** Statements of the subject-specific knowledge and skills that schools are expected to teach students, indicating what students should know and be able to do.
- **Achievement (Performance) standards.** Indices of qualities that specify how adept or competent a student demonstration must be and that consist of the following four components:
 - levels that provide descriptive labels or narratives for student performance (i.e., advanced, Level III, etc.);
 - descriptions of what students at each particular level must demonstrate relative to the task;
 - examples of student work at each level illustrating the range of performance within each level; and
 - cut scores clearly separating each performance level.

Standards-based assessments. Assessments constructed to measure how well students have mastered specific content standards or skills.

Test. A measuring device or procedure. Educational tests are typically composed of questions or tasks designed to elicit predetermined behavioral responses or to measure specific academic content standards.

Test presentation. The method, manner, or structure in which test items or assessments are administered to the student.

Universal design of assessment. A method for developing an assessment to ensure accessibility by all students regardless of ability or disability. Universal design of assessment is based on principles used in the field of architecture in which user diversity is considered during the conceptual stage of development.

INTRODUCTION

The Common Core Essential Elements (EEs) are linked to the Common Core State Standards (CCSS) for English Language Arts. A group of general educators, special educators, and content specialists from member states in the Dynamic Learning Maps (DLM) Consortium gathered to determine the essence of the CCSS.

This document provides a high-level view of the relationship between the CCSS and the links to performance for students with significant cognitive disabilities. It is intended to provide a beginning structure for the design of a summative alternate assessment. The document is not intended as a stand-alone guide to instruction, nor is it intended to contain all the steps in a complete learning progression or detailed curriculum. The DLM and associated professional development will provide greater detail than described in this document.

Beginning with the English Language Arts CCSS, stakeholders defined links to illuminate the precursors for the essential content and skills contained in the grade level CCSS standards and indicators. These EEs are not intended as a redefinition of the standards. Rather, they are intended to describe challenging expectations for students with significant cognitive disabilities in relation to the CCSS. The EEs clarify the bridge between grade-level achievement expectations for students with significant cognitive disabilities who participate in alternate assessments and the CCSS.

Neither are the EEs intended to prescribe the beginning or end of instruction on the content and skills they represent; rather, they indicate the grade level at which initial mastery would be the target to be assessed. Students should begin instruction in content and skills at the earliest point possible and continue instruction until mastery is attained.

The stakeholder group, consisting of state education agency (SEA) representatives and SEA-selected content teachers of students with significant cognitive disabilities, developed instructional achievement level descriptors (IALDs) for each of the EEs. IALDs were defined for four performance levels: I, II, III, and IV. Level III IALDs are aligned with the EEs. The target content and skills for each level of achievement, from Level I to Level IV, were then defined. For each target skill, the stakeholder group developed examples to illustrate how students might demonstrate achievement of the performance level. The IALDs are intended to provide an achievement ladder for students working toward achievement (Level III) of the EEs and onward (Level IV) and toward greater participation in the grade level CCSS to which the EEs are linked. The provided examples are intended to assist teachers to envision how the broad range of students with significant cognitive disabilities might perform the same content, despite the different challenges their disabilities might present. The examples are not exhaustive and do not represent the full range of possibilities in which the highly diverse population of students with significant cognitive disabilities might access the EEs or demonstrate the achievement of those elements. However, the examples do provide some of the ways that performance might be elicited and demonstrated across the spectrum of students with significant cognitive disabilities.

Finally, the stakeholder group developed alternate assessment achievement descriptors for each grade level -- from third grade through high school -- where summative assessments might be required. The alternate assessment achievement descriptors will provide a bridge between the EEs and a summative alternate assessment aligned to them. The descriptors are intended to provide one element to guide development of the test blueprint, development of items and

tasks that measure the full range of achievement, and the setting of cut scores during standard setting for the assessment. The focus of an alternate assessment in a standards-based system is based on the achievement that aligns with EEs linked to grade level content.

Together, the system of standards and descriptors is designed to allow students with significant cognitive disabilities to progress toward the achievement of state standards linked to grade level expectations. The relationship of standards and assessment to teaching and learning are depicted for use by teachers, assessment designers, and users of alternate assessment results.

NCLB GUIDANCE

The stakeholder group's work was guided by the U. S. Department of Education's *Standards and Assessments Peer Review Guidance: Information and Examples for Meeting Requirements of the No Child Left Behind Act of 2001 [NCLB]*, which requires that alternate academic achievement standards align with the alternate assessment. They must

- include knowledge and skills that link to grade level expectations,
- promote access to the general curriculum, and
- reflect professional judgment of the highest learning standards possible for the group of students with the most significant cognitive disabilities.

Although the grade-level content may be reduced in complexity or modified to reflect prerequisite skills, the link to grade-level standards must be clear. The Peer Review Guidance notes that the concept of alternate achievement standards related to grade level may be ambiguous. According to the Guidance, the descriptors

- should be defined in a way that supports individual growth because of their linkage to different content across grades;
- are not likely to show the same clearly defined advances in cognitive complexity as the general education standards when examined across grade levels;
- should rely on the judgment of experienced special educators and administrators, higher education representatives, and parents of students with disabilities as they define alternate achievement standards; and
- should provide an appropriate challenge for students with the most significant cognitive disabilities as they move through their schooling.

The Guidance requires links to grade-level standards. The EEs were developed by DLM consortium states to differentiate knowledge and skills by grade level. This differentiation is intended to clarify the link between the grade-level EEs and the grade-level CCSS and to show a forward progression across grades. The progression of content and skills across years of instruction reflect the changing priorities for instruction and learning as students move from grade to grade. The differences from grade level to grade level are often subtle and progression is sometimes more horizontal than vertical. For example, the grade-to-grade level differences may consist of added skills that are not of obvious increasing rigor compared to the differences found in the CCSS across grade levels. To the degree possible, skills escalate in complexity or rigor at Levels III and IV across the grades, with clear links to the shifting emphasis at each grade level in the CCSS.

The EEs and Achievement Descriptors developed by the DLM consortium states are intended

ACCESS TO INSTRUCTION AND ASSESSMENT

to create the maximum possible access to the CCSS for students with significant cognitive disabilities. The way in which information is presented for instruction and assessment and the manner in which students demonstrate achievement is in no way intended to be limited by statements of EEs or Achievement Descriptors. To that end, modes of communication, both for presentation or response, are not stated in either the EEs or Achievement Descriptors unless a specific mode is an expectation. Where no limitation has been stated, no limitation should be inferred. Students' opportunities to learn and to demonstrate learning should be maximized by providing whatever communication, assistive technologies, augmentative and alternative communication (AAC) devices, or other access tools that are necessary and routinely used by the student during instruction.

Students with significant cognitive disabilities include a broad range of students with diverse disabilities and communication needs. For some students with significant cognitive disabilities, graphic organizers similar to those used by students without disabilities provide useful access to content and are adequate to maximize opportunities to learn and demonstrate achievement. Other students require a range of assistive technologies to access content and demonstrate achievement. For some students, AAC devices and accommodations for hearing and visual impairments will be needed. As with other physical disabilities, students with visual impairments may perform some expectations using modified items, presentations, or response formats. A few items may not lend themselves to such modifications. Decisions about the appropriate modifications for visual impairments are accounted for in the design of the assessments.

The access challenge for some is compounded by the presence of multiple disabilities. All of these needs, as well as the impact of levels of alertness due to medication and other physical disabilities which may affect opportunities to respond appropriately, need to be considered.

Most presentation and response access conditions do not constitute accommodations as they are understood for students who take the general assessment. Methods of presentation that do not violate the intended construct by aiding or directing the students' response allow the student to perceive what knowledge or skill is expected. Aids to responding that do not constitute a violation of the intended construct allow the student to demonstrate the expected knowledge and skills. Examples of acceptable access technologies include the following:

- communication devices that compensate for a students' physical inability to produce independent speech.
- devices that compensate for a students' physical inability to manipulate objects or materials, point to responses, turn pages in a book, or use a pencil or keyboard to answer questions or produce writing.
- tools that maximize a students' ability to acquire knowledge and skills and to demonstrate the products of their learning.

ACCESSING THE GENERAL CURRICULUM

Technology is also of particular importance to students with significant cognitive disabilities to access the general curriculum and achieve the EEs. Although educators have traditionally viewed technology as hardware and software, assistive technology tenets provide a broader view of the applications of low, medium, and high levels of technology use. Assistive technology tools can be vital to a student in acquiring and demonstrating learning unimpeded by the barriers that the disability presents.

Model Symbol Use Throughout Instruction

Many students with significant cognitive disabilities have difficulty with or cannot use speech to communicate and/or are supported by the use of communication symbols (e.g., communication boards, speech generating devices, voice output communication devices) and supports to augment their speech and other means of communication. Students who require symbols and other AAC supports require frequent modeling in the use of those symbols to interact and respond during instruction. Students who use symbols and other communication supports need as much modeling as children who use speech to communicate. Modeling in this way is not viewed as a means of prompting, guidance, or support, just as having a teacher talk serves those purposes for a student who communicates using speech.

When modeling the use of symbols and other communication supports, teachers use the symbols and supports themselves, hand them to students without communication impairments to use, and involve the students who need to use them every day. Each of these steps can play an important role in validating the use of symbols and communication supports and demonstrating multiple levels of expertise in their use.

Use Partner-Assisted Scanning Across the Day

Making a choice from the items on a list, symbols, tactuals, or a communication board can be difficult for some students because they lack the ability to point, cannot see or read the choices, or are positioned too far away (as in group activities). Partner-assisted scanning addresses these issues by asking the communication partner (a teacher, paraprofessional, or peer) to point to each of the options pausing long enough at each for the students with physical and communication impairments to respond “yes” if the item is their desired choice. Depending on the needs of an individual child, the partner can name each option when pointing or simply point.

Throughout the IALDS, examples are provided that require students to select, identify, recognize, and so forth from a number of options. It is suggested that teachers use partner-assisted scanning to support these modes of responding and communicating whenever it appears that the act of directly pointing to a response is too difficult for a particular student.

Use First-Letter Cueing as a Communication Strategy Whenever Possible

Students with communication impairments who are beginning to read, write, and communicate regularly face the challenge of not having access to the words or symbols they want or need to communicate effectively. When attempting to provide them with every possible word they might need, the result is an unmanageable communication system. When guessing what will be most important, it is inevitable that some guesses will be wrong. Until students can spell well enough to communicate their own thoughts, it is important to rely on cueing strategies.

First-letter cueing is one such strategy. Students can use an alphabet display to point to the first letter (or try to spell more) of the word they are trying to communicate. Teachers can use this strategy to help students respond efficiently to questions that involve known choices. Teachers can also model the use of first-letter cueing in their day-to-day interactions with the class. Natural opportunities to incorporate this strategy occur when the teacher is prompting students to recall a specific word (e.g., “I am thinking of a new word we learned yesterday that started with the letter *t*.”) or concept (e.g., “Who remembers the big word we learned to describe when we put things together to find out how many we have in all? It begins with the letter *a*.”). There are times every school day when the adults in the class can model the use of first-letter cueing.

Reading and Writing

Evidence is mounting (Institute for Community Inclusion, 2010; TASH, 2011; & University of Washington, 2010) to support the belief that students with significant cognitive disabilities can learn to read more than sight words, as once thought. It is important that these students are taught to use all the tools for decoding words. However, their journey requires more time to achieve basic reading goals. For that reason, *shared reading* is referenced for students in kindergarten through grade five while foundational skills are being taught and beyond that grade for students achieving below the EE targets. The materials students learn to read at these levels are also at a significantly reduced level of complexity and depth in recognition of the challenges they face in acquiring reading skills. Their need to acquire reading skills remains a goal throughout their school careers.

Writing for these students is also a challenge, but an important goal to attain. The examples provided in this document are intended to communicate that spelling words or writing complete sentences precisely is less important than developing basic writing skills. Many of these students face challenges in developing the required motor skills. While adaptive and alternate writing tools and other technologies are helpful, challenges remain. The technologies may help students overcome challenges in developing the required motor skills, but writing remains a cognitive challenge for these students. Composing sentences will require many years for students with significant cognitive disabilities to achieve. Still, early and continuing efforts are needed to maximize the achievement of these students in this important skill.

GUIDANCE AND SUPPORT

The authors of the CCSS use the words, “prompting and support” at the earliest grade levels to indicate when students were not expected to achieve standards completely independently. Generally, “prompting” refers to “the action of saying something to persuade, encourage, or remind someone to do or say something” (McKean, 2005). However, in special education, prompting is often used to mean a system of structured cues to elicit desired behaviors that otherwise would not occur. In order to communicate clearly that teacher assistance is permitted during instruction of the EEs, and is not limited to structured prompting procedures, the decision was made by the stakeholder group to use the more general term *guidance* throughout the EEs and alternate achievement descriptors.

Guidance and support during instruction should be interpreted as teacher encouragement, general assistance, and informative feedback to support the student in learning. Some examples of the kinds of teacher behaviors that would be considered guidance and support include

- getting the student started (e.g., “Tell me what to do first.”),
- providing a hint in the right direction without revealing the answer (e.g., Student wants to write dog but is unsure how, the teacher might say, “See if you can write the first letter in the word, /d/og.”),
- narrowing the field of choices as a student provides an inaccurate response,
- using structured technologies such as task specific word banks, or
- providing the structured cues such as those found in prompting procedures (e.g., least-to-most prompts, simultaneous prompting, and graduated guidance).

Guidance and support as described above apply to instruction per the examples provided in the IALDS. The IALDs are intended to provide an idea of how students might perform the EEs at the threshold to various achievement levels as they work toward independent mastery.

Alternate assessments measure the degree to which students with significant cognitive disabilities have mastered the EEs. During any assessment, accommodation(s) allowed on the assessment must have been used and practiced during instruction; however, some accommodations that are permissible during instruction would compromise the integrity of the assessments, thereby yielding invalid and unreliable results and cannot be used for assessment purposes. Some guidance and support strategies may not be allowed for assessment purposes when variance in teacher assistance, cues, and prompts could compromise judgments about mastery of the EEs and comparability of administration.

RELATIONSHIP TO THE DYNAMIC LEARNING MAPS ASSESSMENT

The EEs and Achievement Descriptors developed by the DLM consortium states and their stakeholder representatives serve two functions. Instructionally, they provide teachers with information about the level of knowledge and skills expected of their students. Second, they provide elaboration that teachers can use to help guide instruction toward achievement expectations. IALDs were developed for each of the EEs. Each IALD is further clarified by a range of examples. Teachers may find these examples useful for envisioning how their students might perform as they progress toward the expected achievement, as long as they keep in mind that they are examples only and cannot represent the full range of ways in which students might demonstrate their achievement.

Assessment Achievement Level Descriptors (AALDs) will emerge as drafts from the IALDS. The AALDs are content and grade specific, but summarize across the EEs the key performance differences across levels of achievement and across grade levels. While draft AALDs will be used in the initial stages of standard setting to help guide that process, final AALDs will emerge from the standard setting process. Standard setting will take into account the overall degree of accuracy with which a student would need to perform in order to achieve at a particular level. Just as on a general education assessment, no individual student will be expected to perform proficiently on every EE in order to be considered Level III.

For purposes of the DLM assessments under development, the achievement descriptors provide a useful link between the EEs and the DLM assessments. The descriptors, along with DLM developed from the CCSS, provide guidance to the development of the alternate assessment so that a full range of performance is measured and the setting of score ranges within each level rests on a defined frame of reference. The grade level EEs and alternate achievement standards

- standardize meaning for the content and skill expectations,
- create consistency in expected performance,
- emphasize skill similarities for all students participating in the alternate assessments,
- accommodate diverse disabilities, and
- ground alternate assessments in a consistent set of expectations.

Achievement descriptors are used to categorize and explain student performance both in the course of instruction and on the alternate assessment.

SYSTEM ALIGNMENT

The EEs and alternate achievement descriptors are intended to contribute to a fully aligned system of standards, curriculum, teaching, learning, technology, and assessment that optimize equity of opportunity for all students in each classroom, school, and local education agency to access and learn the standards. To the degree possible, the grade level EEs are vertically aligned and linked to the grade level CCSS.

The linkages provided by the EEs to the CCSS are intended to increase access to the general curriculum for all students with disabilities. Examples provided for IALDs at each level of achievement are designed for special education and general education classroom teachers to use in working with special education students who have significant cognitive disabilities. The examples are designed to help teachers evaluate students' progress toward achievement of the EEs as well as illuminate the kinds of performances that indicate various levels of achievement.

Just as the EEs and IALDS are designed to guide teaching practices toward achievement in academic content areas, the standards reframe the expectations for foundational skills in pre-academic and academic areas. Precursor/prerequisite and the unique enabling skills related to English language arts content is specified in the context of their roles as a foundation for students with significant cognitive disabilities to achieve skills related to academic content.

Levels of Performance

Within this document, each grade level EE is cross-referenced to one or several CCSS.

Four performance levels have been proposed for the DLM's alternate academic achievement standards: I, II, III, and IV. Mastery is considered to be demonstrated at Level III and Level IV and is identified as meeting the Level III level on an alternate assessment as specified in the NCLB. A general description of each of these levels is included below:

Level I - A student at this level attempts to perform tasks with support.

Level II - A student at this level demonstrates some content knowledge and skills from the extended grade level standards.

Level III - A student at this level demonstrates content knowledge and skills at a level aligned with the complexity of the EEs.

Level IV - A student at this level demonstrates content knowledge and skills at a higher level of complexity than those described for Level III. Typically, this complexity includes the routine use of symbol systems as applied to English Language Arts.

For each performance level, specific descriptions of content and skills are bulleted and examples of each level of performance are provided. The EEs, IALDs, and examples are intended as a resource for developing individualized education plan (IEP) goals, benchmarks, and curricular materials in reading, language arts, and mathematics. Students may need goals and benchmarks in areas other than academic content domains (e.g., self-care/living skills, mobility). As always, IEPs address the individual needs of each student to make progress toward the standards.

DOCUMENT ORGANIZATION

Common Core Grade-Level Standards are the Standard titles and Grade-Level Indicators as they appear in the CCSS for English Language Arts (Common Core State Standards Initiative, 2010).

Common Core Essential Elements (EEs) describe links to the CCSS for access by students with significant cognitive disabilities.

Instructional Achievement Level Descriptors (IALDs) describe performance at four achievement levels based on the EEs and are accompanied by examples at each achievement level.

Directions for Interpreting Essential Elements

Essential Elements (EEs). The EEs are statements that provide links for students with significant cognitive disabilities to the essential content and skills defined in the grade-level clusters of the CCSS. The EEs provide a bridge for students with significant cognitive disabilities to the CCSS. The EEs are not intended as a reinterpretation of the CCSS; rather, they were developed to create a bridge between the CCSS and challenging achievement expectations for students with significant cognitive disabilities. The order in which the EEs are listed is a direct reflection of the order in which the CCSS are listed. The order is not intended to convey a sequence for instruction; rather, it illustrates progress across years. In the tables, the left column contains the CCSS grade-level standards and indicators, the middle column contains the EE linked to them, and the right column contains the IALDs for each EE and examples for each IALD (as demonstrated by the example provided on the previous page). Each EE and IALD completes the phrase “Students will”

In keeping with the language of the English Language Arts CCSS document, the left hand column in this document will be titled CCSS Grade-Level Standards. This is worded differently in the Math CCSS and that is why the math document reads CCSS Grade-Level Clusters in the left-hand column.

NOTES: N/A is used instead of a descriptor under Level IV, if it was determined by the stakeholder group that the content of the CCSS could not be addressed. In other instances, an N/A at a particular grade level or within a CCSS does not imply that students should not be taught content, skills, or precursors related to the CCSS that are appropriate for instruction.

“Begins in grade ___” is utilized when the expectations for students to begin to demonstrate mastery is found at a higher grade level. Planning for instruction should incorporate instruction related to the higher grade level EE and begin at the earliest possible point for each student. Students with significant cognitive disabilities may require several years of instruction prior to the point at which they may be expected to begin to demonstrate mastery of a concept.

Bullets under instructional achievement levels denote descriptions of achievement at that level for the content related to the essential element.

Examples clarify certain components of EEs. The provided examples are illustrative, not exhaustive. They are intended to provide a range of ways in which a student may demonstrate progress toward the EE and communicate that spelling words and writing complete sentences precisely is less important than developing basic writing skills.

<p>Text Types and Purposes.</p> <p>W.6.1. Write arguments to support claims with clear reasons and relevant evidence.</p> <p>α. Introduce claim(s) and organize the reasons and evidence clearly.</p> <p>β. Support claim(s) with clear reasons and relevant evidence, using credible sources and demonstrating an understanding of the topic or text.</p>	<p>EEW.6.1.a-b. With guidance and support, write a claim and support it with reasons.</p>	<p>Level IV AA Students will:</p> <p>EEW.6.1.a-b. Write a claim and support it with reasons.</p> <p>Ex. Write about something important to them and support it with reasons (e.g., The student writes, <i>need recess</i> and then supports the claim by writing <i>good for me, friends, tired.</i>).</p> <p>Ex. Following reading and discussion of tall tales, make an exaggerated claim and use story elements discussed to support the claim.</p> <p>Level III AA Students will:</p> <p>EEW.6.1.a-b. With guidance and support, write a claim and support it with reasons.</p> <p>Ex. Using a writing template created by the teacher in a talking word processor, fill in a blank to write a claim and to complete more sentences to support the claim (e.g., The student completes the sentence <i>I think we need more computers</i>. And then, the student completes more sentences to give reasons, <i>We need more computers because we don't have enough. We have six students. We only have two computers.</i>).</p> <p>Ex. Following a teacher-led discussion about something important to students, generating written reasons and discussion for and against the claim on an interactive whiteboard, make a claim for one position or the other and then support the claim, using and expanding on the available vocabulary and evidence on the interactive whiteboard (e.g., The student writes, <i>chew gum in school, relax, work harder or not chew gum in school, stick on desk, noisy chew</i>).</p> <p>Level II AA Students will:</p> <p>EEW.6.1.a-b. With guidance and support, write a claim and support it with one reason.</p> <p>Ex. Write a claim with guidance (e.g., The student tells a peer, “ice cream every day” and the peer supports the student in writing the claim by stretching out the sounds in words so the student can type letters in word prediction software and select the appropriate word from the list.).</p> <p>Ex. After a discussion of student interests and school rules, complete a repeated sentence frame to write a claim by writing the appropriate word in the blank (e.g., <i>We need <claim> because <supportive reason>. We need recess because fun. We need gum because good. We need talk because friends.</i>). After each statement, the teacher leads group in identifying claim and discussion of reason.</p> <p>Level I AA Students will:</p> <p>EEW.6.1.a-b. With guidance and support, state a claim.</p> <p>Ex. Work with an adult to select a message to program on a single message voice output device and then use the device to state a claim (e.g., “This is gonna work.”).</p>

<p>RL.7.6. Analyze how an author develops and contrasts the points of view of different characters or narrators in a text.</p>	<p>EERL.7.6. Identify how a character's point of view is the same or different from another character.</p>	<p>Level IV AA Students will: EERL.7.6. Compare points of view of the characters in literary text. Ex. In a popular chapter book, discuss the main character's point of view such as Brian's point of view in <i>Hatchet</i> and compare to another character.</p> <p>Level III AA Students will: EERL.7.6. Identify how a character's point of view is the same or different from another character. Ex. After reading a story (e.g., <i>The Time Machine</i> by H.G. Wells – Classic Starts), identify the difference between how the people in the community feel about their lives in the future and how Victorian Londoners feel; use a graphic organizer for word or picture cards. Ex. After acting out a short play or scenario, identify different points of view of the characters (e.g., "How does ____ feel about ____? Did ____ feel the same way?").</p> <p>Level II AA Students will: EERL.7.6. Identify personal point of view about a story. Ex. Choose a word that represents their own reaction to a story (e.g., <i>Hatchet</i>, <i>The Time Machine</i>, <i>The Cay</i>).</p> <p>Level I AA Students will: EERL.7.6. Identify a character. Ex. Select the picture of the main character.</p>

Compare a video version of a story, poem, or drama to a text-based version of the same story, poem, or drama.</p>	<p>Level IV AA Students will:</p> <p>EERL.7.7. Compare and contrast a video version of a story, poem, or drama. Ex. Determine what is the same and what is different in a video version and text version of the same story (e.g., a movie version compared to book that tells the same story). Ex. Compare and contrast a character’s point of view in a video and text version of the same story.</p> <p>Level III AA Students will:</p> <p>EERL.7.7. Compare a video version of a story, poem, or drama to a text-based version of the same story, poem, or drama. Ex. Compare the animated version to the text version of a story (e.g., <i>Balto</i> compared to Iditarod, Alaskan dog sled race). Ex. After reading a book and viewing a video of the same story, compare events as they happened in each (e.g., After reading <i>The Time Machine</i>, identify several key elements or events from the story. Watch the video of the same story and each time the element or event is evidenced, place the matching word or picture card in a “done” box.).</p> <p>Level II AA Students will:</p> <p>EERL.7.7. Express a preference for a story and video. Ex. Choose which they liked better: story or video.</p> <p>Level I AA Students will:</p> <p>EERL.7.7. Recognize the text version of a story, drama, or poem that matches the audio, video, or live version. Ex. After watching a video presentation of a familiar story, identify the book that tells the same story from choices.</p>

<p>Key Ideas and Details.</p> <p>RI.7.1. Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.</p>	<p>EERI.7.1. Cite text to draw inferences from informational text.</p>	<p>Level IV AA Students will:</p> <p>EERI.7.1. Cite textual evidence to determine what is inferred versus what is explicit. Ex. Explicit = It rained for three days.; Inferred = There will be flooding.</p> <p>Level III AA Students will:</p> <p>EERI.7.1. Cite text to draw inferences from informational text. Ex. Point to the text used after drawing a simple inference about a short passage (e.g., a tornado was scary). Ex. Draw a simple inference from specific text in a passage (e.g., “The sky was dark” means it might rain.).</p> <p>Level II AA Students will:</p> <p>EERI.7.1. Cite text to find one detail to support an inference. Ex. Select a quoted detail from text from choices that include only one quote from the text. Ex. Point to, highlight, or otherwise indicate a detail in the text in the story that supports an inference.</p> <p>Level I AA Students will:</p> <p>EERI.7.1. Identify a detail from a sentence or phrase in the text. Ex. Identify a detail from a picture or graphic illustration by answering “yes” or “no”; turn of the head; eye gaze. Ex. Identify a picture that is related to the text (e.g., picture of pyramids to relate to text on Ancient Egypt.).</p>

<p>RI.7.2. Determine two or more central ideas in a text and analyze their development over the course of the text; provide an objective summary of the text.</p>	<p>EERI.7.2. Determine two central ideas that progress throughout the text.</p>	<p>Level IV AA Students will: EERI.7.2. Determine at least two ideas that contribute to the central ideas of the text. Ex. Asked “What was the passage about?” paraphrases facts for each central idea identified. Ex. Asked “What in the passage said what it was about?” selects and copies or says two facts from choices about each central idea.</p> <p>Level III AA Students will: EERI.7.2. Determine two central ideas that progress throughout the text. Ex. Asked “What are two important things the passage tells?” answer from choices provided. Ex. Asked “What are the two most important steps in the directions?” from a list of lab safety rules, names two rules critical to safety.</p> <p>Level II AA Students will: EERI.7.2. Given sentences from an informational text, identify an important idea. Ex. Using pictures, illustrations, etc., identify an idea Ex. Through auditory or tactile source, identify an idea.</p> <p>Level I AA Students will: EERI.7.2. Identify details from a text. Ex. After shared reading of the safety steps for the science lab, identify a detail from the text (e.g., wear goggles, wear apron, not touch fire). Ex. Identify an object the passage is discussing (e.g., The student points to safety goggles after listening to the safety steps of the science lab.).</p>

<p>CCSS Grade-Level Standards</p> <p>RI.7.3. <p>RI.7.6. Determine an author’s point of view or purpose in a text and analyze how the author distinguishes his or her position from that of others.</p>	<p>EERI.7.6. Determine author’s point of view and compare to own point of view</p>	<p>Level IV AA Students will: EERI.7.6. Respond to the author’s purpose or point of view with own point of view. Ex. What was the author trying to convey and what do you think about that?</p> <p>Level III AA Students will: EERI.7.6. Determine author’s point of view and compare to own point of view. Ex. Read or listen to a passage and answer a question about the author’s point of view (e.g., “Why does the author think you should know about water safety? What do you think about that?”). Ex. Why did the author write the book?</p> <p>Level II AA Students will: EERI.7.6. Identify an author’s thoughts and feelings. Ex. After shared reading of an informational text, answer questions about the thoughts the author shared (e.g., When the teacher asks, “What does the author think about water?” the students answer, “Drink clean water.”). Ex. After shared reading of an informational text, answer questions about the feelings the author shared (e.g., When the teacher asks, “How did the author feel about fire?” the students answer, “sad”, “scared”, etc.).</p> <p>Level I AA Students will: EERI.7.6. Identify a thought of the author. Ex. After shared reading of an informational text, sort a list (text and/or picture-based) into things that were in the text and those that were not (e.g., In text - <i>The bird wants to go home</i>, versus not in text - <i>The boy wants cake</i>). Ex. After shared reading of an informational text when the group discusses what they heard, hit a switch when someone says something that was in the text.</p>

Peers write all of the ideas in a list and give it to the student to use in revising and adding more information to improve the overall quality of the writing. Ex. Work with peers to plan a written report of their research project. Each takes turns reading what they have to one another and then the group works together to add ideas to a graphic organizer provided by the teacher. Finally, the student adds ideas from the graphic organizer to own writing to strengthen it. Ex. After reading a science text, work with a classmate to take notes in graphic organizer software, convert the graphic representation into an outline, and use word prediction software with a specific topic dictionary to complete the L column of a KWL chart, share it with another pair of classmates, and revise based on their feedback.</p> <p>Level II AA Students will: EEW.8.5. With guidance and support from adults and peers, plan by brainstorming to strengthen own writing. Ex. Work with the teacher to brainstorm ideas of things to add to strengthen her writing. The teacher adds the ideas to a software-based graphic organizer and shows the student how the ideas can be used in writing. Ex. Work with peers to brainstorm ideas for writing and record them in own writing folders to use in future writing. Ex. Work with the teacher and peers in writing groups to listen to each group member respond (“What I liked best about your writing . . .,” “One question I have is . . .?”) and “One suggestion I have is . . .”), and use that feedback to revise draft with teacher guidance.</p> <p>Level I AA Students will: EEW.8.5. With guidance and support from peers and adults, write. Ex. With guidance and support from peers, select words from a word bank to write. Ex. With guidance and support from an adult, use partner-assisted scanning with two switches to direct the adult to say each letter of the alphabet (e.g., “Tell me the next one.”) and write desired letters (“Write that one for me.”). Ex. Working with a peer on the computer, type a letter and the peer adds to the letter to create a word. Together, they compose a text.</p>

GLOSSARY OF ENGLISH LANGUAGE ARTS TERMS

Adapted text (simplified). Substitutes linguistically frequently occurring vocabulary for infrequently occurring nontechnical vocabulary, shortens sentence length, lowers reading level, and restructures sentences to reduce their complexity. See http://www.coursecrafters.com/ELL-Outlook/2006/mar_apr/ELLOutlookITIArticle1.htm

Adapted text (elaborated). Clarifies, elaborates, and explains implicit information and makes connections explicit with words sometimes added to increase comprehension. See http://www.coursecrafters.com/ELL-Outlook/2006/mar_apr/ELLOutlookITIArticle1.htm

Assistive technology. Any item, piece of equipment, or product system, whether acquired commercially, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of individuals with disabilities. See <http://standards.gov/assistivetechology.cfm>

Context clues. Bits of information from the text that, when combined with the reader's own knowledge, help the reader determine the meaning of the text, or unknown words in the text.

Decoding. Understanding that a printed word represents the spoken word, and that this printed word is made of a sequence of phonemes.

Digital literacy. Ability to use digital technology, communication tools, or networks to locate, evaluate, use and create information; ability to understand and use information in multiple formats from a wide range of sources when it is presented via computers; person's ability to perform tasks effectively in a digital environment. Literacy includes the ability to read and interpret media, to reproduce data and images through digital manipulation, and to evaluate and apply new knowledge gained from digital environments. See <http://www.library.illinois.edu/digit/definition.html>

Digital tools. Tools that involve or relate to the use of a computer/technology.

Distracters. An incorrect choice among multiple-choice answers on a question or test. See <http://dictionary.reference.com/browse/distractor>

Encode. To represent complicated information in a simple or short way.

Episode. A brief unit of action in a literary work; a situation that is part of a narrative.

Figurative language. Uses "figures of speech" as a way of saying something other than the literal meaning of the words (e.g., All the world's a stage.); hyperbole, metaphor, onomatopoeia.

Figurative meaning. Exaggerated or altered meaning of words used as a figure of speech (e.g., She swims like a dolphin (simile); figurative meaning is that she swims very well.).

Formal language. Adheres to stricter grammar rules, does not follow informal, spontaneous language (language between friends).

Graphic organizer. A diagram or pictorial device used to record and show relationships among ideas or information. An example could be a Venn diagram or a T-chart.

Guided writing activities/lessons. Temporary, small group lessons teaching strategies that students most need to practice with guidance from a teacher. See <http://www.readwritethink.org/professional-development/strategy-guides/guided-writing-30685.html>

High-frequency words. Words that appear frequently in writing, reading, and language.

Hyperbole. Way of speaking or writing (emphatic exaggeration) that makes someone or something sound bigger, better, more, etc. than they are (e.g., You've grown like a bean sprout!).

Idiom. Words in a fixed order that have a particular meaning that is different from the meaning of each word separately (e.g., "Bitten off more than you can chew."; "It's raining cats and dogs."; and "A little under the weather.")

Independent writing. Children write their own pieces, such as stories and informational narratives, retellings, labeling, speech balloons, lists, etc. See http://www.oe.k12.mi.us/balanced_literacy/independent_writing.htm

Inference. Assuming that something is true or forming an opinion based on information.

Informational (natural) language. Refers to spontaneous language (language between friends) that has less strict grammar rules and/or shorter sentences.

Informational text. Text that intends to provide information on a particular topic (e.g., an essay written about the Battle of Gettysburg).

Informational essay/text/writing. Writing that intends to provide information on a particular topic (e.g., Students write informational pieces about the effects of global warming, the impact of women in politics, and the salaries and endorsements in professional sports.).

Intonation. The sound changes produced by the rise and fall of the voice when speaking, especially when this has an effect on the meaning of what is said.

Literary elements. Characterizations, setting(s), plot(s) (including exposition, rising action, climax, and falling action), and theme(s) developed by an author over the course of a story.

Metaphor. An expression (figure of speech) which describes a person or object in a literary way by referring to something that is considered to have similar characteristics to the person or object being described, such as "The mind is an ocean," and "The city is a jungle."

Multimedia book. Combines media of communication (e.g., text, graphics, and sound).

Multimodal. Having or involving several or a combination of learning styles, modes, or modalities (e.g., auditory, kinesthetic, visual, or a combination).

Onomatopoeia. The creation and use of words which include sounds that are similar to the noises (imitates) that the words refer to (e.g., hiss, buzz, bang, or the word "zip" imitates the sound of zipping up one's coat).

Open-ended questions. A question beginning with such words as *what, why, how, describe that* are designed to encourage a full, meaningful answer using the subject's own knowledge and/or feelings. See <http://www.mediacollege.com/journalism/interviews/open-ended-questions.html> and http://changingminds.org/techniques/questioning/open_closed_questions.htm

Phonemes. Abstract units of the phonetic system of a language that corresponds to a set of similar speech sounds (as the velar \k\ of cool and the palatal \k\ of keel) which are perceived to be a single distinctive sound in the language. See <http://www.merriam-webster.com/dictionary/phoneme>

Phonetic spelling. The representation of vocal sounds which express pronunciations of words and a system of spelling in which each letter represents invariably the same spoken sound. See <http://dictionary.reference.com/help/faq/language/s08.html>

Picture exchange cards (PECS). Originally created by Pyramid Products as a tool for communicating with non-verbal people on the spectrum. Since its invention, though, “PECS” has become shorthand for any kind of image-based communication.

Prompt levels/prompt hierarchy. To make something happen.

- **Verbal prompts** - Statements that help learners acquire target skills (e.g., “You might need to try it a different way,” “Write your name.”).
- **Gestural prompts** - Movements that cue learners to use a particular behavior or skill (e.g., pointing to the top of the paper where the learner needs to write his name).
- **Model prompts** - Models the target skill or behavior. Full model prompts can be verbal if the skill being taught is verbal, or they can be motor responses if the skill being taught involves moving a body part.
- **Physical prompts** - Touches to help a student use the target behavior or skill (e.g., tapping a learner’s hand to cue writing, putting hand over learner’s to help writing).
- **Visual prompts** - Pictures of events that provide learners with information about how to use the target skill or behavior (e.g., task analysis checklist, transition picture card). See <http://autismpdc.fpg.unc.edu/content/prompting>

Roots (morphemes). The most basic form of a word that is still able to convey a particular thought or meaning.

Segmental phonemes. One of the phonemes (as \k, a, t\ in cat, tack, act) of a language that can be assigned to a relative sequential order of minimal segments. See <http://www.merriam-webster.com/dictionary/segmental%20phoneme>

Sensory language/sensory words. Words that refer to the senses of sight, touch, hearing, smell, and taste that can help add realism to writing.

Shared reading. An interactive reading experience where children interact with the reading of a big book or other enlarged text as guided by a teacher or other experienced reader, generally accomplished using an enlarged text that all children can see. See http://www.oe.k12.mi.us/balanced_literacy/shared_reading.htm

Shared writing activity/modeled writing. An approach to writing where the teacher and children work together to compose messages and stories where children provide the ideas and the teacher supports the process as a scribe. The message is usually related to some individual or group experience. The teacher provides full support, modeling and demonstrating the process of putting children’s ideas into written language. See http://www.oe.k12.mi.us/balanced_literacy/modeled_writing.htm

Short essay. Literary composition on a single subject, usually presenting the personal view of the author. See <http://www.thefreedictionary.com/essay>

Simile. The use of an expression (figure of speech) comparing one thing with another, always including the words “as” or “like” (e.g., She swims like a dolphin.).

Social story. Describes a situation, skill, or concept in terms of relevant social cues, perspectives, and common responses and shares accurate social information that is easily understood by its audience. See <http://www.thegraycenter.org/social-stories/what-are-social-stories>

Speech/voice-to-text technology. A type of speech recognition program that converts spoken to written language. See <http://searchunifiedcommunications.techtarget.com/definition/voice-to-text>

Spatial and temporal relationships/meaning words. Signal event order (e.g., *behind*, *under*, *after*, *soon*, *next*, and *later*).

Story elements. Plot, setting, genre, point of view, characters, and order of events.

Textual evidence. Evidence from one or more texts used to support an argument/position, and is derived from reading and drawing from other text(s). It is provided in the form of quotation, paraphrase, descriptions of theory, and also description. See http://wiki.answers.com/Q/What_is_a_textual_evidence

Theme or central idea. Main thought or topic in a work of literature

Vivid verbs. Words that express an action with an implied emphasis (e.g., “He sprinted down the street,” or “He dashed down the street,” rather than “He ran down the street.”).

Word family. Groups of words that have a common feature or pattern (also known as phonograms, rhymes, or chunks). *At*, *cat*, *hat*, and *fat* are a family of words with the “at” sound and letter combination in common. Common word families include: *ack*, *ain*, *ake*, *ale*, *all*, *ame*, *an*, *ank*, *ap*, *ash*, *at*, *ate*, *aw*, *ay*, *eat*, *ell*, *est*, *ice*, *ick*, *ide*, *ight*, *ill*, *in*, *ine*, *ing*, *ink*, *ip*, *it*, *ock*, *oke*, *op*, *ore*, *ot*, *uck*, *ug*, *ump*, *unk*. See <http://www.enchantedlearning.com/rhymes/wordfamilies/>

GLOSSARY OF SPECIAL EDUCATION TERMS

Accommodations. Changes in the administration of an assessment, such as setting, scheduling, timing, presentation format, response mode, or others, including any combination of these that does not change the construct intended to be measured by the assessment or the meaning of the resulting scores. Accommodations are used for equity, not advantage, and serve to level the playing field. To be appropriate, assessment accommodations must be identified in the student’s Individualized Education Plan (IEP) or Section 504 plan and used regularly during instruction and classroom assessment.

Achievement descriptors. Narrative descriptions of performance levels that convey student performance at each achievement level and further defines content standards by connecting them to information that describes how well students are doing in learning the knowledge and skills contained in the content standards. See also “performance descriptors.”

Achievement levels. A measurement that distinguishes an adequate performance from a novice or expert performance. Achievement levels provide a determination of the extent to which a student has met the content standards. See also “performance levels.”

Achievement standard. A system that includes performance levels (e.g., unsatisfactory, proficient, or advanced), descriptions of student performance for each level, examples of student work representing the entire range of performance for each level, and cut scores. A system of performance standards operationalizes and further defines content standards by connecting them to information that describes how well students are doing in learning the knowledge and skills contained in the content standards. See also “performance standards.”

Achievement test. An instrument designed to measure efficiently the amount of academic knowledge and/or skill a student has acquired from instruction. Such tests provide information that can be compared to either a norm group or a measure of performance, such as a standard.

Age appropriate. The characteristics of the skills taught, the activities and materials selected, and the language level employed that reflect the chronological age of the student.

Alignment. The similarity or match between or among content standards, achievement (performance) standards, curriculum, instruction, and assessments in terms of equal breadth, depth, and complexity of knowledge and skill expectations.

Alternate assessment. An instrument used in gathering information on the standards-based performance and progress of students whose disabilities preclude their valid and reliable participation in general assessments. Alternate assessments measure the performance of a relatively small population of students who are unable to participate in the general assessment system, even with accommodations, as determined by the IEP team.

Assessment. The process of collecting information about individuals, groups, or systems that relies upon a number of instruments, one of which may be a test, making assessment a more comprehensive term than *test*.

Assessment literacy. The knowledge of the basic principles of sound assessment practice including terminology, development, administration, analysis, and standards of quality.

Assistance. (versus support) The degree to which the teacher provides aid to the student’s performance that provides direct assistance in the content or skill being demonstrated by the student. That is, the assistance involves the teacher performing the cognitive work required. Assistance results in an invalidation of the item or score. See also “support.”

Assistive technology. A device, piece of equipment, product system or service that is used to increase, maintain, or improve the functional capabilities of a student with a disability. (See 34 CFR §300.5 and 300.6.)

Cues. Assistance, words, or actions provided to a student to increase the likelihood that the student will give the desired response.

Curriculum. A document that describes what teachers do in order to convey grade-level knowledge and skills to a student.

Depth. The level of cognitive processing (e.g., recognition, recall, problem solving, analysis, synthesis, and evaluation) required for success relative to the performance standards.

Disaggregation. The collection and reporting of student achievement results by particular subgroups (e.g., students with disabilities, limited English proficient students), to ascertain the subgroup’s academic progress. Disaggregation makes it possible to compare subgroups or cohorts.

Essence of the Standard. Is that which conveys the same ideas, skills, and content of the standard, expressed in simpler terms.

Essential Elements (EEs or CCEEs). The Common Core Essential Elements are specific statements of the content and skills that are linked to the Common Core State Standards (CCSS) grade level specific expectations for students with significant cognitive disabilities.

Grade Band Essential Element. A statement of essential precursor content and skills linked to the Common Core State Standards (CCSS) grade-level standards and indicators that maintain the essence of that standard, thereby identifying the grade-level expectations for students with significant cognitive disabilities to access and make progress in the general curriculum.

Grade level. The grade in which a student is enrolled.

Individualized Education Program (IEP). An IEP is a written plan, developed by a team of regular and special educators, parents, related service personnel and the student, as appropriate, describing the specially designed instruction needed for an eligible exceptional student to progress in the content standards and objectives and to meet other educational needs.

Linked. A relationship between a grade-level indicator for Common Core State Standards (CCSS) and Common Core Essential Elements (EEs or CCEEs) that reflects similar content and skills but does not match the breadth, depth, and complexity of the standards.

Multiple measures. Measurement of student or school performance through more than one form or test

- For students, these might include teacher observations, performance assessments, or portfolios.
- For schools, these might include dropout rates, absenteeism, college attendance, or documented behavior problems.

Natural cue. Assistance given to a student that provides a flow among the expectations presented by the educator, opportunities to learn, and the desired outcome exhibited by the student.

Opportunity to learn. The provision of learning conditions, including suitable adjustments, to maximize a student’s chances of attaining the desired learning outcomes, such as the mastery of content standards.

Readability. The formatting of presented material that considers the organization of text; syntactic complexity of sentences; use of abstractions; density of concepts; sequence and organization of ideas; page format; sentence length; paragraph length; variety of punctuation; student background knowledge or interest; and use of illustrations or graphics in determining the appropriate level of difficulty of instructional or assessment materials.

Real-world application. The opportunity for a student to exhibit a behavior or complete a task that he or she would normally be expected to perform outside of the school environment.

Response requirements. The type, kind, or method of action required of a student to answer a question or testing item. The response may include, but is not limited to, reading, writing, speaking, creating, and drawing.

Stakeholders. A group of individuals perceived to be vested in a particular decision (e.g., a policy decision).

Standardized. An established procedure that assures that a test is administered with the same directions, under the same conditions, and is scored in the same manner for all students to ensure the comparability of scores. Standardization allows reliable and valid comparison to be made among students taking the test. The two major types of standardized tests are norm-referenced and criterion-referenced.

Standards. There are two types of standards, content, and achievement (performance).

- **Content standards.** Statements of the subject-specific knowledge and skills that schools are expected to teach students, indicating what students should know and be able to do.
- **Achievement (Performance) standards.** Indices of qualities that specify how adept or competent a student demonstration must be and that consist of the following four components:
 - levels that provide descriptive labels or narratives for student performance (i.e., advanced, Level III, etc.);
 - descriptions of what students at each particular level must demonstrate relative to the task;
 - examples of student work at each level illustrating the range of performance within each level; and
 - cut scores clearly separating each performance level.

Standards-based assessments. Assessments constructed to measure how well students have mastered specific content standards or skills.

Test. A measuring device or procedure. Educational tests are typically composed of questions or tasks designed to elicit predetermined behavioral responses or to measure specific academic content standards.

Test presentation. The method, manner, or structure in which test items or assessments are administered to the student.

Universal design of assessment. A method for developing an assessment to ensure accessibility by all students regardless of ability or disability. Universal design of assessment is based on principles used in the field of architecture in which user diversity is considered during the conceptual stage of development.

INTRODUCTION

The Common Core Essential Elements (EEs) are linked to the Common Core State Standards (CCSS) for English Language Arts. A group of general educators, special educators, and content specialists from member states in the Dynamic Learning Maps (DLM) Consortium gathered to determine the essence of the CCSS.

This document provides a high-level view of the relationship between the CCSS and the links to performance for students with significant cognitive disabilities. It is intended to provide a beginning structure for the design of a summative alternate assessment. The document is not intended as a stand-alone guide to instruction, nor is it intended to contain all the steps in a complete learning progression or detailed curriculum. The DLM and associated professional development will provide greater detail than described in this document.

Beginning with the English Language Arts CCSS, stakeholders defined links to illuminate the precursors for the essential content and skills contained in the grade level CCSS standards and indicators. These EEs are not intended as a redefinition of the standards. Rather, they are intended to describe challenging expectations for students with significant cognitive disabilities in relation to the CCSS. The EEs clarify the bridge between grade-level achievement expectations for students with significant cognitive disabilities who participate in alternate assessments and the CCSS.

Neither are the EEs intended to prescribe the beginning or end of instruction on the content and skills they represent; rather, they indicate the grade level at which initial mastery would be the target to be assessed. Students should begin instruction in content and skills at the earliest point possible and continue instruction until mastery is attained.

The stakeholder group, consisting of state education agency (SEA) representatives and SEA-selected content teachers of students with significant cognitive disabilities, developed instructional achievement level descriptors (IALDs) for each of the EEs. IALDs were defined for four performance levels: I, II, III, and IV. Level III IALDs are aligned with the EEs. The target content and skills for each level of achievement, from Level I to Level IV, were then defined. For each target skill, the stakeholder group developed examples to illustrate how students might demonstrate achievement of the performance level. The IALDs are intended to provide an achievement ladder for students working toward achievement (Level III) of the EEs and onward (Level IV) and toward greater participation in the grade level CCSS to which the EEs are linked. The provided examples are intended to assist teachers to envision how the broad range of students with significant cognitive disabilities might perform the same content, despite the different challenges their disabilities might present. The examples are not exhaustive and do not represent the full range of possibilities in which the highly diverse population of students with significant cognitive disabilities might access the EEs or demonstrate the achievement of those elements. However, the examples do provide some of the ways that performance might be elicited and demonstrated across the spectrum of students with significant cognitive disabilities.

Finally, the stakeholder group developed alternate assessment achievement descriptors for each grade level -- from third grade through high school -- where summative assessments might be required. The alternate assessment achievement descriptors will provide a bridge between the EEs and a summative alternate assessment aligned to them. The descriptors are intended to provide one element to guide development of the test blueprint, development of items and

tasks that measure the full range of achievement, and the setting of cut scores during standard setting for the assessment. The focus of an alternate assessment in a standards-based system is based on the achievement that aligns with EEs linked to grade level content.

Together, the system of standards and descriptors is designed to allow students with significant cognitive disabilities to progress toward the achievement of state standards linked to grade level expectations. The relationship of standards and assessment to teaching and learning are depicted for use by teachers, assessment designers, and users of alternate assessment results.

NCLB GUIDANCE

The stakeholder group's work was guided by the U. S. Department of Education's *Standards and Assessments Peer Review Guidance: Information and Examples for Meeting Requirements of the No Child Left Behind Act of 2001 [NCLB]*, which requires that alternate academic achievement standards align with the alternate assessment. They must

- include knowledge and skills that link to grade level expectations,
- promote access to the general curriculum, and
- reflect professional judgment of the highest learning standards possible for the group of students with the most significant cognitive disabilities.

Although the grade-level content may be reduced in complexity or modified to reflect prerequisite skills, the link to grade-level standards must be clear. The Peer Review Guidance notes that the concept of alternate achievement standards related to grade level may be ambiguous. According to the Guidance, the descriptors

- should be defined in a way that supports individual growth because of their linkage to different content across grades;
- are not likely to show the same clearly defined advances in cognitive complexity as the general education standards when examined across grade levels;
- should rely on the judgment of experienced special educators and administrators, higher education representatives, and parents of students with disabilities as they define alternate achievement standards; and
- should provide an appropriate challenge for students with the most significant cognitive disabilities as they move through their schooling.

The Guidance requires links to grade-level standards. The EEs were developed by DLM consortium states to differentiate knowledge and skills by grade level. This differentiation is intended to clarify the link between the grade-level EEs and the grade-level CCSS and to show a forward progression across grades. The progression of content and skills across years of instruction reflect the changing priorities for instruction and learning as students move from grade to grade. The differences from grade level to grade level are often subtle and progression is sometimes more horizontal than vertical. For example, the grade-to-grade level differences may consist of added skills that are not of obvious increasing rigor compared to the differences found in the CCSS across grade levels. To the degree possible, skills escalate in complexity or rigor at Levels III and IV across the grades, with clear links to the shifting emphasis at each grade level in the CCSS.

The EEs and Achievement Descriptors developed by the DLM consortium states are intended

ACCESS TO INSTRUCTION AND ASSESSMENT

to create the maximum possible access to the CCSS for students with significant cognitive disabilities. The way in which information is presented for instruction and assessment and the manner in which students demonstrate achievement is in no way intended to be limited by statements of EEs or Achievement Descriptors. To that end, modes of communication, both for presentation or response, are not stated in either the EEs or Achievement Descriptors unless a specific mode is an expectation. Where no limitation has been stated, no limitation should be inferred. Students' opportunities to learn and to demonstrate learning should be maximized by providing whatever communication, assistive technologies, augmentative and alternative communication (AAC) devices, or other access tools that are necessary and routinely used by the student during instruction.

Students with significant cognitive disabilities include a broad range of students with diverse disabilities and communication needs. For some students with significant cognitive disabilities, graphic organizers similar to those used by students without disabilities provide useful access to content and are adequate to maximize opportunities to learn and demonstrate achievement. Other students require a range of assistive technologies to access content and demonstrate achievement. For some students, AAC devices and accommodations for hearing and visual impairments will be needed. As with other physical disabilities, students with visual impairments may perform some expectations using modified items, presentations, or response formats. A few items may not lend themselves to such modifications. Decisions about the appropriate modifications for visual impairments are accounted for in the design of the assessments.

The access challenge for some is compounded by the presence of multiple disabilities. All of these needs, as well as the impact of levels of alertness due to medication and other physical disabilities which may affect opportunities to respond appropriately, need to be considered.

Most presentation and response access conditions do not constitute accommodations as they are understood for students who take the general assessment. Methods of presentation that do not violate the intended construct by aiding or directing the students' response allow the student to perceive what knowledge or skill is expected. Aids to responding that do not constitute a violation of the intended construct allow the student to demonstrate the expected knowledge and skills. Examples of acceptable access technologies include the following:

- communication devices that compensate for a students' physical inability to produce independent speech.
- devices that compensate for a students' physical inability to manipulate objects or materials, point to responses, turn pages in a book, or use a pencil or keyboard to answer questions or produce writing.
- tools that maximize a students' ability to acquire knowledge and skills and to demonstrate the products of their learning.

ACCESSING THE GENERAL CURRICULUM

Technology is also of particular importance to students with significant cognitive disabilities to access the general curriculum and achieve the EEs. Although educators have traditionally viewed technology as hardware and software, assistive technology tenets provide a broader view of the applications of low, medium, and high levels of technology use. Assistive technology tools can be vital to a student in acquiring and demonstrating learning unimpeded by the barriers that the disability presents.

Model Symbol Use Throughout Instruction

Many students with significant cognitive disabilities have difficulty with or cannot use speech to communicate and/or are supported by the use of communication symbols (e.g., communication boards, speech generating devices, voice output communication devices) and supports to augment their speech and other means of communication. Students who require symbols and other AAC supports require frequent modeling in the use of those symbols to interact and respond during instruction. Students who use symbols and other communication supports need as much modeling as children who use speech to communicate. Modeling in this way is not viewed as a means of prompting, guidance, or support, just as having a teacher talk serves those purposes for a student who communicates using speech.

When modeling the use of symbols and other communication supports, teachers use the symbols and supports themselves, hand them to students without communication impairments to use, and involve the students who need to use them every day. Each of these steps can play an important role in validating the use of symbols and communication supports and demonstrating multiple levels of expertise in their use.

Use Partner-Assisted Scanning Across the Day

Making a choice from the items on a list, symbols, tactuals, or a communication board can be difficult for some students because they lack the ability to point, cannot see or read the choices, or are positioned too far away (as in group activities). Partner-assisted scanning addresses these issues by asking the communication partner (a teacher, paraprofessional, or peer) to point to each of the options pausing long enough at each for the students with physical and communication impairments to respond “yes” if the item is their desired choice. Depending on the needs of an individual child, the partner can name each option when pointing or simply point.

Throughout the IALDS, examples are provided that require students to select, identify, recognize, and so forth from a number of options. It is suggested that teachers use partner-assisted scanning to support these modes of responding and communicating whenever it appears that the act of directly pointing to a response is too difficult for a particular student.

Use First-Letter Cueing as a Communication Strategy Whenever Possible

Students with communication impairments who are beginning to read, write, and communicate regularly face the challenge of not having access to the words or symbols they want or need to communicate effectively. When attempting to provide them with every possible word they might need, the result is an unmanageable communication system. When guessing what will be most important, it is inevitable that some guesses will be wrong. Until students can spell well enough to communicate their own thoughts, it is important to rely on cueing strategies.

First-letter cueing is one such strategy. Students can use an alphabet display to point to the first letter (or try to spell more) of the word they are trying to communicate. Teachers can use this strategy to help students respond efficiently to questions that involve known choices. Teachers can also model the use of first-letter cueing in their day-to-day interactions with the class. Natural opportunities to incorporate this strategy occur when the teacher is prompting students to recall a specific word (e.g., “I am thinking of a new word we learned yesterday that started with the letter *t*.”) or concept (e.g., “Who remembers the big word we learned to describe when we put things together to find out how many we have in all? It begins with the letter *a*.”). There are times every school day when the adults in the class can model the use of first-letter cueing.

Reading and Writing

Evidence is mounting (Institute for Community Inclusion, 2010; TASH, 2011; & University of Washington, 2010) to support the belief that students with significant cognitive disabilities can learn to read more than sight words, as once thought. It is important that these students are taught to use all the tools for decoding words. However, their journey requires more time to achieve basic reading goals. For that reason, *shared reading* is referenced for students in kindergarten through grade five while foundational skills are being taught and beyond that grade for students achieving below the EE targets. The materials students learn to read at these levels are also at a significantly reduced level of complexity and depth in recognition of the challenges they face in acquiring reading skills. Their need to acquire reading skills remains a goal throughout their school careers.

Writing for these students is also a challenge, but an important goal to attain. The examples provided in this document are intended to communicate that spelling words or writing complete sentences precisely is less important than developing basic writing skills. Many of these students face challenges in developing the required motor skills. While adaptive and alternate writing tools and other technologies are helpful, challenges remain. The technologies may help students overcome challenges in developing the required motor skills, but writing remains a cognitive challenge for these students. Composing sentences will require many years for students with significant cognitive disabilities to achieve. Still, early and continuing efforts are needed to maximize the achievement of these students in this important skill.

GUIDANCE AND SUPPORT

The authors of the CCSS use the words, “prompting and support” at the earliest grade levels to indicate when students were not expected to achieve standards completely independently. Generally, “prompting” refers to “the action of saying something to persuade, encourage, or remind someone to do or say something” (McKean, 2005). However, in special education, prompting is often used to mean a system of structured cues to elicit desired behaviors that otherwise would not occur. In order to communicate clearly that teacher assistance is permitted during instruction of the EEs, and is not limited to structured prompting procedures, the decision was made by the stakeholder group to use the more general term *guidance* throughout the EEs and alternate achievement descriptors.

Guidance and support during instruction should be interpreted as teacher encouragement, general assistance, and informative feedback to support the student in learning. Some examples of the kinds of teacher behaviors that would be considered guidance and support include

- getting the student started (e.g., “Tell me what to do first.”),
- providing a hint in the right direction without revealing the answer (e.g., Student wants to write dog but is unsure how, the teacher might say, “See if you can write the first letter in the word, /d/og.”),
- narrowing the field of choices as a student provides an inaccurate response,
- using structured technologies such as task specific word banks, or
- providing the structured cues such as those found in prompting procedures (e.g., least-to-most prompts, simultaneous prompting, and graduated guidance).

Guidance and support as described above apply to instruction per the examples provided in the IALDS. The IALDs are intended to provide an idea of how students might perform the EEs at the threshold to various achievement levels as they work toward independent mastery.

Alternate assessments measure the degree to which students with significant cognitive disabilities have mastered the EEs. During any assessment, accommodation(s) allowed on the assessment must have been used and practiced during instruction; however, some accommodations that are permissible during instruction would compromise the integrity of the assessments, thereby yielding invalid and unreliable results and cannot be used for assessment purposes. Some guidance and support strategies may not be allowed for assessment purposes when variance in teacher assistance, cues, and prompts could compromise judgments about mastery of the EEs and comparability of administration.

RELATIONSHIP TO THE DYNAMIC LEARNING MAPS ASSESSMENT

The EEs and Achievement Descriptors developed by the DLM consortium states and their stakeholder representatives serve two functions. Instructionally, they provide teachers with information about the level of knowledge and skills expected of their students. Second, they provide elaboration that teachers can use to help guide instruction toward achievement expectations. IALDs were developed for each of the EEs. Each IALD is further clarified by a range of examples. Teachers may find these examples useful for envisioning how their students might perform as they progress toward the expected achievement, as long as they keep in mind that they are examples only and cannot represent the full range of ways in which students might demonstrate their achievement.

Assessment Achievement Level Descriptors (AALDs) will emerge as drafts from the IALDS. The AALDs are content and grade specific, but summarize across the EEs the key performance differences across levels of achievement and across grade levels. While draft AALDs will be used in the initial stages of standard setting to help guide that process, final AALDs will emerge from the standard setting process. Standard setting will take into account the overall degree of accuracy with which a student would need to perform in order to achieve at a particular level. Just as on a general education assessment, no individual student will be expected to perform proficiently on every EE in order to be considered Level III.

For purposes of the DLM assessments under development, the achievement descriptors provide a useful link between the EEs and the DLM assessments. The descriptors, along with DLM developed from the CCSS, provide guidance to the development of the alternate assessment so that a full range of performance is measured and the setting of score ranges within each level rests on a defined frame of reference. The grade level EEs and alternate achievement standards

- standardize meaning for the content and skill expectations,
- create consistency in expected performance,
- emphasize skill similarities for all students participating in the alternate assessments,
- accommodate diverse disabilities, and
- ground alternate assessments in a consistent set of expectations.

Achievement descriptors are used to categorize and explain student performance both in the course of instruction and on the alternate assessment.

SYSTEM ALIGNMENT

The EEs and alternate achievement descriptors are intended to contribute to a fully aligned system of standards, curriculum, teaching, learning, technology, and assessment that optimize equity of opportunity for all students in each classroom, school, and local education agency to access and learn the standards. To the degree possible, the grade level EEs are vertically aligned and linked to the grade level CCSS.

The linkages provided by the EEs to the CCSS are intended to increase access to the general curriculum for all students with disabilities. Examples provided for IALDs at each level of achievement are designed for special education and general education classroom teachers to use in working with special education students who have significant cognitive disabilities. The examples are designed to help teachers evaluate students' progress toward achievement of the EEs as well as illuminate the kinds of performances that indicate various levels of achievement.

Just as the EEs and IALDS are designed to guide teaching practices toward achievement in academic content areas, the standards reframe the expectations for foundational skills in pre-academic and academic areas. Precursor/prerequisite and the unique enabling skills related to English language arts content is specified in the context of their roles as a foundation for students with significant cognitive disabilities to achieve skills related to academic content.

Levels of Performance

Within this document, each grade level EE is cross-referenced to one or several CCSS.

Four performance levels have been proposed for the DLM's alternate academic achievement standards: I, II, III, and IV. Mastery is considered to be demonstrated at Level III and Level IV and is identified as meeting the Level III level on an alternate assessment as specified in the NCLB. A general description of each of these levels is included below:

Level I - A student at this level attempts to perform tasks with support.

Level II - A student at this level demonstrates some content knowledge and skills from the extended grade level standards.

Level III - A student at this level demonstrates content knowledge and skills at a level aligned with the complexity of the EEs.

Level IV - A student at this level demonstrates content knowledge and skills at a higher level of complexity than those described for Level III. Typically, this complexity includes the routine use of symbol systems as applied to English Language Arts.

For each performance level, specific descriptions of content and skills are bulleted and examples of each level of performance are provided. The EEs, IALDs, and examples are intended as a resource for developing individualized education plan (IEP) goals, benchmarks, and curricular materials in reading, language arts, and mathematics. Students may need goals and benchmarks in areas other than academic content domains (e.g., self-care/living skills, mobility). As always, IEPs address the individual needs of each student to make progress toward the standards.

DOCUMENT ORGANIZATION

Common Core Grade-Level Standards are the Standard titles and Grade-Level Indicators as they appear in the CCSS for English Language Arts (Common Core State Standards Initiative, 2010).

Common Core Essential Elements (EEs) describe links to the CCSS for access by students with significant cognitive disabilities.

Instructional Achievement Level Descriptors (IALDs) describe performance at four achievement levels based on the EEs and are accompanied by examples at each achievement level.

<p>Key Ideas and Details.</p> <p>RL.K.1. With prompting and support, ask and answer questions about key details in a text.</p>	<p>EERL.K.1. With guidance and support, identify details in familiar stories.</p>	<p>Level IV AA Students will: EERL.K.1. Identify key details in familiar story. Ex. Identify a key detail from a familiar story given an array of choices, including similar distracters. Ex. Signal to indicate when a detail is read aloud in a familiar text during a book sharing experience when the teacher asks students to listen for a particular detail. Ex. Turn to the part of a book where a detail is written about or depicted in the illustrations.</p> <p>Level III AA Students will: EERL.K.1. With guidance and support, identify details in familiar stories. Ex. With guidance and support (e.g., remind the student to think about what the story told us about the character’s home), identify a detail from a familiar story given an array of choices. Ex. With guidance and support (e.g., dramatic pause or rise in intonation by teacher), signal to indicate when a detail is read during a book sharing experience (e.g., the teacher is reading a book with the student and the student vocalizes, hits a switch or otherwise signals the teacher to indicate that a detail was just shared). Ex. With guidance and support (e.g., tells the student to find the part of the book where a specific detail is shown), turn to the part of a book where a detail is written about or depicted in the illustrations.</p> <p>Level II AA Students will: EERL.K.1. With guidance and support, identify a favorite detail in familiar story. Ex. With guidance and support, identify a picture in a familiar story that is related to own experience (e.g., the story includes a dog and the student has a dog). Ex. With guidance and support, responds “Me!” when the teacher reads about ice cream in a familiar book and says, “Who likes ice cream?”</p> <p>Level I AA Students will: EERL.K.1. With guidance and support, interact with or explore pictures and objects related to a familiar story. Ex. Look at the pictures in a book that is being read. Ex. Open and pulls flaps in a lift-the-flap book while it is being read. Ex. Pulls off or puts on picture symbols that relate to a familiar story as it is being read. Ex. Touches the tactualized illustrations in a book while it is being read.</p>

Directions for Interpreting Essential Elements

Essential Elements (EEs). The EEs are statements that provide links for students with significant cognitive disabilities to the essential content and skills defined in the grade-level clusters of the CCSS. The EEs provide a bridge for students with significant cognitive disabilities to the CCSS. The EEs are not intended as a reinterpretation of the CCSS; rather, they were developed to create a bridge between the CCSS and challenging achievement expectations for students with significant cognitive disabilities. The order in which the EEs are listed is a direct reflection of the order in which the CCSS are listed. The order is not intended to convey a sequence for instruction; rather, it illustrates progress across years. In the tables, the left column contains the CCSS grade-level standards and indicators, the middle column contains the EE linked to them, and the right column contains the IALDs for each EE and examples for each IALD (as demonstrated by the example provided on the previous page). Each EE and IALD completes the phrase “Students will”

In keeping with the language of the English Language Arts CCSS document, the left hand column in this document will be titled CCSS Grade-Level Standards. This is worded differently in the Math CCSS and that is why the math document reads CCSS Grade-Level Clusters in the left-hand column.

NOTES: N/A is used instead of a descriptor under Level IV, if it was determined by the stakeholder group that the content of the CCSS could not be addressed. In other instances, an N/A at a particular grade level or within a CCSS does not imply that students should not be taught content, skills, or precursors related to the CCSS that are appropriate for instruction.

“Begins in grade ___” is utilized when the expectations for students to begin to demonstrate mastery is found at a higher grade level. Planning for instruction should incorporate instruction related to the higher grade level EE and begin at the earliest possible point for each student. Students with significant cognitive disabilities may require several years of instruction prior to the point at which they may be expected to begin to demonstrate mastery of a concept.

Bullets under instructional achievement levels denote descriptions of achievement at that level for the content related to the essential element.

Examples clarify certain components of EEs. The provided examples are illustrative, not exhaustive. They are intended to provide a range of ways in which a student may demonstrate progress toward the EE and communicate that spelling words and writing complete sentences precisely is less important than developing basic writing skills.

Determine the central idea of the text and select details that relate to it; recount the text. Ex. Identify the main idea of the story and identify two details related to the main idea, then recount the text. Ex. Given a text projected on the interactive whiteboard, the student will identify the best central idea statement and then highlight details that relate to it. The student will use the result to support a recounting of the projected text.</p> <p>Level II AA Students will: EERL.9-10.2. Distinguish between the central idea and details in a text. Ex. Sort a list of story-related details and central idea statements into the appropriate groups. Ex. Given three story elements (two details and a central idea), select the central idea.</p> <p>Level I AA Students will: EERL.9-10.2. Identify details from a text. Ex. Highlight details in a story projected on an interactive whiteboard. Ex. Select details that relate to a text, given a list of details.</p>

<p>RL.9-10.3. Analyze how complex characters (e.g., those with multiple or conflicting motivations) develop over the course of a text, interact with other characters, and advance the plot or develop the theme.</p>	<p>EERL.9-10.3. Describe interactions between characters.</p>	<p>Level IV AA Students will: EERL.9-10.3. Describe how characters develop and interact with other characters. Ex. Chart interactions between characters that lead to changes in a character's behavior. Ex. Describe how the main character (e.g., Winnie in <i>Tuck Everlasting</i>) develops throughout the story (e.g., <i>she wants freedom, fears death, accepts eternity</i>) and how interactions with other characters (e.g., the Tucks) impact the change.</p> <p>Level III AA Students will: EERL.9-10.3. Describe interactions between characters. Ex. Select a word(s) to describe how two characters interact, (e.g., Tom and Alex support one another). Ex. Select a word(s) to describe what one character did in response to another's action (e.g., "What did Tom do when Alex ran away?").</p> <p>Level II AA Students will: EERL.9-10.3. Identify the things characters do when they interact. Ex. Given three choices, identify what two characters in a story do when they are together (e.g., Tom and Alex get into trouble together.).</p> <p>Level I AA Students will: EERL.9-10.3. Identify words that describe characters. Ex. From a choice of descriptive words, choose one that describes a character, (e.g., "Was Tom tall or short?"). Ex. Identify the gender of characters or animals in the story (e.g., "Is <character's name> a girl or a boy?").</p>

<p>RL.9-10.5. Analyze how an author’s choices concerning how to structure a text, order events within it (e.g., parallel plots), and manipulate time (e.g., pacing, flashbacks) create such effects as mystery, tension, or surprise.</p>	<p>EERL.9-10.5. Determine the sequence of events in a story or drama.</p>	<p>Level IV AA Students will: EERL.9-10.5. Determine the actual sequence of events in a story or drama that has a manipulated sequence (e.g., flashbacks). Ex. Given several events in a story, arrange the events in the order they actually happened as opposed to the order they were told by the author.</p> <p>Level III AA Students will: EERL.9-10.5. Determine the sequence of four or more events in a story or drama. Ex. Given four or more events in a story, arrange the events in the correct order. Ex. Arrange sentence strips to show at least four events in correct sequence from a story.</p> <p>Level II AA Students will: EERL.9-10.5. Identify beginning, middle, and end of a text with a clear sequence. Ex. Given three events from a story, determine which happened in the beginning, middle, and end. Ex. Complete a graphic organizer that shows the events that happened at the beginning, middle, and end of a story.</p> <p>Level I AA Students will: EERL.9-10.5. Identify events from a story. Ex. Given a list of events, identify events that occurred in the story. Ex. Use a switch to confirm whether each event presented was or was not in the story as the teacher reads each event and asks, “Was this in the story?”</p>

<p>RL.9-10.6. Analyze a particular point of view or cultural experience reflected in a work of literature from outside the United States, drawing on a wide reading of world literature.</p>	<p>EERL.9-10.6. Connect the experiences of characters in a story or drama from outside of the U.S. with personal experience.</p>	<p>Level IV AA Students will: EERL.9-10.6. Compare and contrast the cultural experiences of characters in a story or drama from outside the U.S. with personal experience. Ex. After reading a story about a boy or girl in another county (e.g., <i>Crow Boy</i>), compare and contrast the life of the character with one’s own life.</p> <p>Level III AA Students will: EERL.9-10.6. Connect the experiences of characters in a story or drama from outside the U.S. with personal experience. Ex. Connect an experience of the character in the story from another culture to an experience of the student, (e.g., “Have you ever been to the beach? How was it like what Jesse in the story saw at the beach?”). Ex. Connect an experience of a character to a personal experience of the student.</p> <p>Level II AA Students will: EERL.9-10.6. Identify the experiences of a character in a story or drama from outside the U.S. Ex. With the text projected on an interactive whiteboard, highlight all of the sentences that tell about the character’s experiences. Ex. Given a list of experiences, identify those that the character in the book experienced.</p> <p>Level I AA Students will: EERL.9-10.6. Recognize a character doing an action. Ex. Identify a character on a video, in a book, or in a magazine who is doing something familiar.</p>

<p>Key Ideas and Details.</p> <p>RI.9-10.1. Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.</p>	<p>EERI.9-10.1. Determine which citations demonstrate what the text says explicitly as well as inferentially.</p>	<p>Level IV AA Students will:</p> <p>EERI.9-10.1. Cite textual evidence to draw inferences from the text.</p> <p>Ex. Use a graphic organizer such as a two-column chart with the headings, “What I Know” and “Facts”. Fill in the graphic organizer by using examples from text of “Facts” (e.g., “Steps are numbered, if I do #3 before I do #2, I don’t have the pieces I need.”) that support an inference “What I Know” (e.g., need to do steps in order).</p> <p>Ex. While reading a historical text, infer what will happen next in the text using textual evidence to support the inference (e.g., <i>The soldiers gathered on the battlefield</i> supports an inference that there is going to be a fight).</p> <p>Level III AA Students will:</p> <p>EERI.9-10.1. Determine which citations demonstrate what the text says explicitly as well as inferentially.</p> <p>Ex. Draw an inference about an informational text (e.g., <i>It is important to know the weather to plan activities for the day.</i>) and select two facts from a weather report that support the inference (e.g., <i>The weather will be sunny in the morning but it will rain in the afternoon.</i>).</p> <p>Ex. After reading a narrative on a march with Martin Luther King, select an inference from choices (e.g., <i>The marchers did not want anyone to get hurt.</i>) and choose a related fact stated in the text to support the inference (e.g., <i>The people did not bring guns or clubs.</i>).</p> <p>Level II AA Students will:</p> <p>EERI.9-10.1. Determine which citations demonstrate what the text says explicitly.</p> <p>Ex. Underline text that tells how a task should be completed.</p> <p>Ex. Given a question and text posted on an interactive whiteboard, research to find the answer to a question after a peer reads the question aloud and discusses it with the student before reading the text aloud to find the answer. Ex. Read or listen to sections of a book about water highlighted by a peer or teacher, and then use highlighted information to write an answer to a question (e.g., “Where is most of the water on earth?” <i>Water in oshun</i> [ocean]).</p> <p>Level I AA Students will:</p> <p>EEW:9-10.7. With guidance and support, answer questions based on a text or other sources of information. Ex. With guidance and support, answer a yes or no question about an experience described in a text they have authored using word prediction software with a topic-specific dictionary. Ex. With guidance and support, answer multiple-choice questions about information provided in a text that they have co-authored with a peer about a favorite school activity. Ex. Use word prediction software to answer questions about an illustration from a favorite text inserted in a digital document, and, if spelling is unclear, answer yes or no questions about their answer.</p>

<p>CCSS Grade-Level Standards</p> <p>W.9-10.8. GLOSSARY OF ENGLISH LANGUAGE ARTS TERMS

Adapted text (simplified). Substitutes linguistically frequently occurring vocabulary for infrequently occurring nontechnical vocabulary, shortens sentence length, lowers reading level, and restructures sentences to reduce their complexity. See http://www.coursecrafters.com/ELL-Outlook/2006/mar_apr/ELLOutlookITIArticle1.htm

Adapted text (elaborated). Clarifies, elaborates, and explains implicit information and makes connections explicit with words sometimes added to increase comprehension. See http://www.coursecrafters.com/ELL-Outlook/2006/mar_apr/ELLOutlookITIArticle1.htm

Assistive technology. Any item, piece of equipment, or product system, whether acquired commercially, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of individuals with disabilities. See <http://standards.gov/assistivetechology.cfm>

Context clues. Bits of information from the text that, when combined with the reader's own knowledge, help the reader determine the meaning of the text, or unknown words in the text.

Decoding. Understanding that a printed word represents the spoken word, and that this printed word is made of a sequence of phonemes.

Digital literacy. Ability to use digital technology, communication tools, or networks to locate, evaluate, use and create information; ability to understand and use information in multiple formats from a wide range of sources when it is presented via computers; person's ability to perform tasks effectively in a digital environment. Literacy includes the ability to read and interpret media, to reproduce data and images through digital manipulation, and to evaluate and apply new knowledge gained from digital environments. See <http://www.library.illinois.edu/digit/definition.html>

Digital tools. Tools that involve or relate to the use of a computer/technology.

Distracters. An incorrect choice among multiple-choice answers on a question or test. See <http://dictionary.reference.com/browse/distractor>

Encode. To represent complicated information in a simple or short way.

Episode. A brief unit of action in a literary work; a situation that is part of a narrative.

Figurative language. Uses "figures of speech" as a way of saying something other than the literal meaning of the words (e.g., All the world's a stage.); hyperbole, metaphor, onomatopoeia.

Figurative meaning. Exaggerated or altered meaning of words used as a figure of speech (e.g., She swims like a dolphin (simile); figurative meaning is that she swims very well.).

Formal language. Adheres to stricter grammar rules, does not follow informal, spontaneous language (language between friends).

Graphic organizer. A diagram or pictorial device used to record and show relationships among ideas or information. An example could be a Venn diagram or a T-chart.

Guided writing activities/lessons. Temporary, small group lessons teaching strategies that students most need to practice with guidance from a teacher. See <http://www.readwritethink.org/professional-development/strategy-guides/guided-writing-30685.html>

High-frequency words. Words that appear frequently in writing, reading, and language.

Hyperbole. Way of speaking or writing (emphatic exaggeration) that makes someone or something sound bigger, better, more, etc. than they are (e.g., You've grown like a bean sprout!).

Idiom. Words in a fixed order that have a particular meaning that is different from the meaning of each word separately (e.g., "Bitten off more than you can chew."; "It's raining cats and dogs."; and "A little under the weather.")

Independent writing. Children write their own pieces, such as stories and informational narratives, retellings, labeling, speech balloons, lists, etc. See http://www.oe.k12.mi.us/balanced_literacy/independent_writing.htm

Inference. Assuming that something is true or forming an opinion based on information.

Informational (natural) language. Refers to spontaneous language (language between friends) that has less strict grammar rules and/or shorter sentences.

Informational text. Text that intends to provide information on a particular topic (e.g., an essay written about the Battle of Gettysburg).

Informational essay/text/writing. Writing that intends to provide information on a particular topic (e.g., Students write informational pieces about the effects of global warming, the impact of women in politics, and the salaries and endorsements in professional sports.).

Intonation. The sound changes produced by the rise and fall of the voice when speaking, especially when this has an effect on the meaning of what is said.

Literary elements. Characterizations, setting(s), plot(s) (including exposition, rising action, climax, and falling action), and theme(s) developed by an author over the course of a story.

Metaphor. An expression (figure of speech) which describes a person or object in a literary way by referring to something that is considered to have similar characteristics to the person or object being described, such as "The mind is an ocean," and "The city is a jungle."

Multimedia book. Combines media of communication (e.g., text, graphics, and sound).

Multimodal. Having or involving several or a combination of learning styles, modes, or modalities (e.g., auditory, kinesthetic, visual, or a combination).

Onomatopoeia. The creation and use of words which include sounds that are similar to the noises (imitates) that the words refer to (e.g., hiss, buzz, bang, or the word "zip" imitates the sound of zipping up one's coat).

Open-ended questions. A question beginning with such words as *what, why, how, describe that* are designed to encourage a full, meaningful answer using the subject's own knowledge and/or feelings. See <http://www.mediacollege.com/journalism/interviews/open-ended-questions.html> and http://changingminds.org/techniques/questioning/open_closed_questions.htm

Phonemes. Abstract units of the phonetic system of a language that corresponds to a set of similar speech sounds (as the velar \k\ of cool and the palatal \k\ of keel) which are perceived to be a single distinctive sound in the language. See <http://www.merriam-webster.com/dictionary/phoneme>

Phonetic spelling. The representation of vocal sounds which express pronunciations of words and a system of spelling in which each letter represents invariably the same spoken sound. See <http://dictionary.reference.com/help/faq/language/s08.html>

Picture exchange cards (PECS). Originally created by Pyramid Products as a tool for communicating with non-verbal people on the spectrum. Since its invention, though, “PECS” has become shorthand for any kind of image-based communication.

Prompt levels/prompt hierarchy. To make something happen.

- **Verbal prompts** - Statements that help learners acquire target skills (e.g., “You might need to try it a different way,” “Write your name.”).
- **Gestural prompts** - Movements that cue learners to use a particular behavior or skill (e.g., pointing to the top of the paper where the learner needs to write his name).
- **Model prompts** - Models the target skill or behavior. Full model prompts can be verbal if the skill being taught is verbal, or they can be motor responses if the skill being taught involves moving a body part.
- **Physical prompts** - Touches to help a student use the target behavior or skill (e.g., tapping a learner’s hand to cue writing, putting hand over learner’s to help writing).
- **Visual prompts** - Pictures of events that provide learners with information about how to use the target skill or behavior (e.g., task analysis checklist, transition picture card). See <http://autismpdc.fpg.unc.edu/content/prompting>

Roots (morphemes). The most basic form of a word that is still able to convey a particular thought or meaning.

Segmental phonemes. One of the phonemes (as \k, a, t\ in cat, tack, act) of a language that can be assigned to a relative sequential order of minimal segments. See <http://www.merriam-webster.com/dictionary/segmental%20phoneme>

Sensory language/sensory words. Words that refer to the senses of sight, touch, hearing, smell, and taste that can help add realism to writing.

Shared reading. An interactive reading experience where children interact with the reading of a big book or other enlarged text as guided by a teacher or other experienced reader, generally accomplished using an enlarged text that all children can see. See http://www.oe.k12.mi.us/balanced_literacy/shared_reading.htm

Shared writing activity/modeled writing. An approach to writing where the teacher and children work together to compose messages and stories where children provide the ideas and the teacher supports the process as a scribe. The message is usually related to some individual or group experience. The teacher provides full support, modeling and demonstrating the process of putting children’s ideas into written language. See http://www.oe.k12.mi.us/balanced_literacy/modeled_writing.htm

Short essay. Literary composition on a single subject, usually presenting the personal view of the author. See <http://www.thefreedictionary.com/essay>

Simile. The use of an expression (figure of speech) comparing one thing with another, always including the words “as” or “like” (e.g., She swims like a dolphin.).

Social story. Describes a situation, skill, or concept in terms of relevant social cues, perspectives, and common responses and shares accurate social information that is easily understood by its audience. See <http://www.thegraycenter.org/social-stories/what-are-social-stories>

Speech/voice-to-text technology. A type of speech recognition program that converts spoken to written language. See <http://searchunifiedcommunications.techtarget.com/definition/voice-to-text>

Spatial and temporal relationships/meaning words. Signal event order (e.g., *behind*, *under*, *after*, *soon*, *next*, and *later*).

Story elements. Plot, setting, genre, point of view, characters, and order of events.

Textual evidence. Evidence from one or more texts used to support an argument/position, and is derived from reading and drawing from other text(s). It is provided in the form of quotation, paraphrase, descriptions of theory, and also description. See http://wiki.answers.com/Q/What_is_a_textual_evidence

Theme or central idea. Main thought or topic in a work of literature

Vivid verbs. Words that express an action with an implied emphasis (e.g., “He sprinted down the street,” or “He dashed down the street,” rather than “He ran down the street.”).

Word family. Groups of words that have a common feature or pattern (also known as phonograms, rhymes, or chunks). *At*, *cat*, *hat*, and *fat* are a family of words with the “at” sound and letter combination in common. Common word families include: *ack*, *ain*, *ake*, *ale*, *all*, *ame*, *an*, *ank*, *ap*, *ash*, *at*, *ate*, *aw*, *ay*, *eat*, *ell*, *est*, *ice*, *ick*, *ide*, *ight*, *ill*, *in*, *ine*, *ing*, *ink*, *ip*, *it*, *ock*, *oke*, *op*, *ore*, *ot*, *uck*, *ug*, *ump*, *unk*. See <http://www.enchantedlearning.com/rhymes/wordfamilies/>

GLOSSARY OF SPECIAL EDUCATION TERMS

Accommodations. Changes in the administration of an assessment, such as setting, scheduling, timing, presentation format, response mode, or others, including any combination of these that does not change the construct intended to be measured by the assessment or the meaning of the resulting scores. Accommodations are used for equity, not advantage, and serve to level the playing field. To be appropriate, assessment accommodations must be identified in the student’s Individualized Education Plan (IEP) or Section 504 plan and used regularly during instruction and classroom assessment.

Achievement descriptors. Narrative descriptions of performance levels that convey student performance at each achievement level and further defines content standards by connecting them to information that describes how well students are doing in learning the knowledge and skills contained in the content standards. See also “performance descriptors.”

Achievement levels. A measurement that distinguishes an adequate performance from a novice or expert performance. Achievement levels provide a determination of the extent to which a student has met the content standards. See also “performance levels.”

Achievement standard. A system that includes performance levels (e.g., unsatisfactory, proficient, or advanced), descriptions of student performance for each level, examples of student work representing the entire range of performance for each level, and cut scores. A system of performance standards operationalizes and further defines content standards by connecting them to information that describes how well students are doing in learning the knowledge and skills contained in the content standards. See also “performance standards.”

Achievement test. An instrument designed to measure efficiently the amount of academic knowledge and/or skill a student has acquired from instruction. Such tests provide information that can be compared to either a norm group or a measure of performance, such as a standard.

Age appropriate. The characteristics of the skills taught, the activities and materials selected, and the language level employed that reflect the chronological age of the student.

Alignment. The similarity or match between or among content standards, achievement (performance) standards, curriculum, instruction, and assessments in terms of equal breadth, depth, and complexity of knowledge and skill expectations.

Alternate assessment. An instrument used in gathering information on the standards-based performance and progress of students whose disabilities preclude their valid and reliable participation in general assessments. Alternate assessments measure the performance of a relatively small population of students who are unable to participate in the general assessment system, even with accommodations, as determined by the IEP team.

Assessment. The process of collecting information about individuals, groups, or systems that relies upon a number of instruments, one of which may be a test, making assessment a more comprehensive term than *test*.

Assessment literacy. The knowledge of the basic principles of sound assessment practice including terminology, development, administration, analysis, and standards of quality.

Assistance. (versus support) The degree to which the teacher provides aid to the student’s performance that provides direct assistance in the content or skill being demonstrated by the student. That is, the assistance involves the teacher performing the cognitive work required. Assistance results in an invalidation of the item or score. See also “support.”

Assistive technology. A device, piece of equipment, product system or service that is used to increase, maintain, or improve the functional capabilities of a student with a disability. (See 34 CFR §300.5 and 300.6.)

Cues. Assistance, words, or actions provided to a student to increase the likelihood that the student will give the desired response.

Curriculum. A document that describes what teachers do in order to convey grade-level knowledge and skills to a student.

Depth. The level of cognitive processing (e.g., recognition, recall, problem solving, analysis, synthesis, and evaluation) required for success relative to the performance standards.

Disaggregation. The collection and reporting of student achievement results by particular subgroups (e.g., students with disabilities, limited English proficient students), to ascertain the subgroup’s academic progress. Disaggregation makes it possible to compare subgroups or cohorts.

Essence of the Standard. Is that which conveys the same ideas, skills, and content of the standard, expressed in simpler terms.

Essential Elements (EEs or CCEEs). The Common Core Essential Elements are specific statements of the content and skills that are linked to the Common Core State Standards (CCSS) grade level specific expectations for students with significant cognitive disabilities.

Grade Band Essential Element. A statement of essential precursor content and skills linked to the Common Core State Standards (CCSS) grade-level standards and indicators that maintain the essence of that standard, thereby identifying the grade-level expectations for students with significant cognitive disabilities to access and make progress in the general curriculum.

Grade level. The grade in which a student is enrolled.

Individualized Education Program (IEP). An IEP is a written plan, developed by a team of regular and special educators, parents, related service personnel and the student, as appropriate, describing the specially designed instruction needed for an eligible exceptional student to progress in the content standards and objectives and to meet other educational needs.

Linked. A relationship between a grade-level indicator for Common Core State Standards (CCSS) and Common Core Essential Elements (EEs or CCEEs) that reflects similar content and skills but does not match the breadth, depth, and complexity of the standards.

Multiple measures. Measurement of student or school performance through more than one form or test

- For students, these might include teacher observations, performance assessments, or portfolios.
- For schools, these might include dropout rates, absenteeism, college attendance, or documented behavior problems.

Natural cue. Assistance given to a student that provides a flow among the expectations presented by the educator, opportunities to learn, and the desired outcome exhibited by the student.

Opportunity to learn. The provision of learning conditions, including suitable adjustments, to maximize a student’s chances of attaining the desired learning outcomes, such as the mastery of content standards.

Readability. The formatting of presented material that considers the organization of text; syntactic complexity of sentences; use of abstractions; density of concepts; sequence and organization of ideas; page format; sentence length; paragraph length; variety of punctuation; student background knowledge or interest; and use of illustrations or graphics in determining the appropriate level of difficulty of instructional or assessment materials.

Real-world application. The opportunity for a student to exhibit a behavior or complete a task that he or she would normally be expected to perform outside of the school environment.

Response requirements. The type, kind, or method of action required of a student to answer a question or testing item. The response may include, but is not limited to, reading, writing, speaking, creating, and drawing.

Stakeholders. A group of individuals perceived to be vested in a particular decision (e.g., a policy decision).

Standardized. An established procedure that assures that a test is administered with the same directions, under the same conditions, and is scored in the same manner for all students to ensure the comparability of scores. Standardization allows reliable and valid comparison to be made among students taking the test. The two major types of standardized tests are norm-referenced and criterion-referenced.

Standards. There are two types of standards, content, and achievement (performance).

- **Content standards.** Statements of the subject-specific knowledge and skills that schools are expected to teach students, indicating what students should know and be able to do.
- **Achievement (Performance) standards.** Indices of qualities that specify how adept or competent a student demonstration must be and that consist of the following four components:
 - levels that provide descriptive labels or narratives for student performance (i.e., advanced, Level III, etc.);
 - descriptions of what students at each particular level must demonstrate relative to the task;
 - examples of student work at each level illustrating the range of performance within each level; and
 - cut scores clearly separating each performance level.

Standards-based assessments. Assessments constructed to measure how well students have mastered specific content standards or skills.

Test. A measuring device or procedure. Educational tests are typically composed of questions or tasks designed to elicit predetermined behavioral responses or to measure specific academic content standards.

Test presentation. The method, manner, or structure in which test items or assessments are administered to the student.

Universal design of assessment. A method for developing an assessment to ensure accessibility by all students regardless of ability or disability. Universal design of assessment is based on principles used in the field of architecture in which user diversity is considered during the conceptual stage of development.
