

Root Cause Analysis in Action

Audience: Virtual Series

Given the complexities of our school systems, identifying the root causes of systemic inequities can be challenging. To promote meaningful improvement that is sustainable over time, leadership teams must engage in deep, thoughtful, and multi-faceted root cause analysis. In this professional learning offering, participants will be introduced to the process of root cause analysis and provided with key information that will empower them to develop improvement plans resulting in better outcomes for students with disabilities.

In this training, participants will:

- Discuss key system thinking concepts, with an emphasis on identifying and managing our mental models.
- Explore three steps of a thorough root cause analysis: data collection and analysis, investigate and summarize findings, improvement, and implementation
- Create an investigation plan to guide and launch the process of root cause analysis

Please join us for a comprehensive learning experience:

December 6-7, 2022 | 9:00am - 12:00pm

January 25-26, 2023 | 9:00am - 12:00pm

March 22-23, 2023 | 9:00am - 12:00pm
